

**REGULATIONS FOR THE DEGREE OF  
MASTER OF URBAN DESIGN<sup>1</sup>  
(MURbanDesign)**

*(See also General Regulations)*

Any publication based on work approved for a higher degree should contain a reference to the effect that the work was submitted to the University of Hong Kong for the award of the degree.

---

**Admission requirements**

**Ar16** To be eligible for admission to the courses leading to the degree of Master of Urban Design, a candidate

- (a) shall comply with the General Regulations;
  - (b) shall hold
    - a Bachelor's degree of this University in a relevant subject; or
    - a Master of Architecture degree of this University; or
    - another relevant qualification of equivalent standard from this University or from another university or comparable institution accepted for this purpose; and
  - (c) shall satisfy the examiners in a qualifying examination if required.
- 

**Qualifying examination**

**Ar17**

- (a) A qualifying examination may be set to test the candidate's formal academic ability or his ability to follow the courses of study prescribed. It shall consist of one or more written papers or their equivalent and may include a project report.
  - (b) A candidate who is required to satisfy the examiners in a qualifying examination shall not be permitted to register until he has satisfied the examiners in the examination.
- 

**Award of degree**

**Ar18** To be eligible for the award of the degree of Master of Urban Design, a candidate

- (a) shall comply with the General Regulations; and
  - (b) shall complete the curriculum and satisfy the examiners in accordance with the regulations and syllabuses set out below.
- 

**Curriculum**

**Ar19**

- (a) The curriculum shall extend over not less than one year of full-time study or two years of part-time study and not more than three years in all cases, with normally 48 units<sup>2</sup> of enrolled courses, and shall include all examinations, urban design project reports, and a dissertation as detailed below.

---

<sup>1</sup> These syllabuses apply to MUD candidates admitted since the academic year 2001-2002.

<sup>2</sup> 1 unit = 8 teaching hours per semester (or 3-unit course = 2 teaching hours per week)

- (b) To complete the curriculum, candidates
- (i) shall follow courses of instruction and complete satisfactorily all prescribed written work and practical work where appropriate;
  - (ii) shall complete work prescribed in the Urban design studio I (9 units); Urban design studio II (9 units); and Dissertation/Design thesis (12 units);
  - (iii) shall normally satisfy the examiners in not less than six courses including five core courses;

City planning and design  
 Urban design  
 Physical environment and site planning  
 CAD in urban design  
 Financial analysis for urban projects

and the balance from a list of elective courses approved from time to time. Candidates may be required to study courses such as Introduction to Graphics for Urban Design, as determined by the Programme Director in order to strengthen their academic background and as programme prerequisites depending on their field of specialization and the courses selected. Such courses will not be counted towards the minimum of six courses required. A list of elective courses is given below. The list may vary from year to year and will be announced at the beginning of each year.

Conservation management and practice  
 Location and transport in urban design  
 Design of cities  
 Techniques in urban design  
 Advanced market analysis in urban design  
 History and theory of landscape architecture I  
 Ecology and Design  
 Project management for urban design

Selection of elective courses shall be made in consultation with the Programme Director concerned to secure specialization in either urban design or real estate development and be subject to the approval of the Head of Department.

Candidates may upon an application be granted exemption from one core course on the basis of their previous studies; candidates who have been granted exemption may be required to take an elective course in lieu of and be granted permission by the Head of Department upon the recommendation of the Programme Director.

- (iv) shall satisfy the examiners in each of the courses followed either by a written paper or an assessment of coursework, or a combination of these methods. The examiners may at their discretion prescribe an oral examination in any course or on any work prescribed in the Urban Design studio.

- Ar20** Candidates who are MArch graduates and registered for the dual degree programme:
- (a) shall complete the curriculum in not less than 9 months of full-time study; and
  - (b) shall gain 6 units of common MArch/MUD courses and 9 units of MArch/MUD joint studio course and shall complete work prescribed in one Urban design studio (9 units), Dissertation/Design thesis (12 units) and in not less than four courses including three core courses.

## Examinations

### Ar21

- (a) Candidates who have failed to satisfy the examiners at first attempt in not more than three courses (core or elective) followed during an academic year may be permitted to present themselves for re-examination in the failed courses at a specified date. If they again fail, but in not more than two courses, they may be permitted to repeat the relevant curriculum and to present themselves for re-examination at a specified date in the failed course(s) at a third and last attempt. Candidates who have failed to satisfy the examiners in one or more electives in their first attempt may be permitted under special circumstances to register for alternative courses and be examined at a specified date. If they fail to satisfy the examiners, in any of the substitute courses, they may be permitted to present themselves for re-examination only once more at specified date. If any of the failed courses is not being offered in the particular academic year, this may be construed as a special circumstance for the purpose of this article.
- (b) Candidates who have failed to satisfy the examiners in any academic year in work prescribed in the Urban Design studio or in the Dissertation/Design Thesis may be permitted to present themselves for re-examination at a specified date. If they again fail to satisfy the examiners in any work, they shall be required to repeat all or part of the work prescribed during the academic year and to present themselves for re-examination at a specified date in the work repeated.
- (c) Candidates shall be recommended for discontinuation under the following circumstances:
- (i) if they fail to satisfy the examiners at a first attempt in more than three courses followed during an academic year;
  - (ii) if they fail to satisfy the examiners in any of the failed courses in their third attempt or in any of the failed substitute courses in their second attempt;
  - (iii) if they fail to satisfy the examiners in their third attempt in any of the work prescribed in the Urban design studio or in Dissertation/Design Thesis.
  - (iv) if they fail to satisfy all requirements for the award of the degree within three academic years from the commencement of studies.

### Examination results

**Ar22** After presentation of the dissertation and after conclusion of the examination, a pass list of candidates awarded the Master of Urban Design degree shall be published. A candidate who has shown exceptional merit may be awarded a mark of distinction, and this mark shall be recorded on the candidate's degree certificate.

## SYLLABUSES FOR THE DEGREE OF MASTER OF URBAN DESIGN<sup>3</sup>

For the purpose of these syllabuses, the teaching of each course will be conducted within one semester.

### CORE COURSES

#### **ARCH6101. Urban design studio I (9 units)**

Urban design project 1: a series of sessions examining basic design concepts, and developing practical drawing and sketches of urban design proposals for selected sites in Hong Kong. Urban design project 2: Design to professional standard involving a large site and its implementation, taking into account issues such as land acquisition, planning approvals, concept development, financing, the consultancy team, construction, marketing among others. This studio is conducted over one semester.

<sup>3</sup> These syllabuses apply to MUD candidates admitted since the academic year 2001-2002.

**ARCH6102. Urban design studio II (9 units)**

Real-life large-scale urban design and development projects involving land reclamation and infrastructure provision leading to a 3-D built form. Designed to professional standards involving relevant urban design theory and implementation criteria, and conducted with participation of professionals in both public and private sectors. This is normally done as joint studio projects with candidates from the architecture and landscape design streams, under the guidance of professionals involved with all aspects of the built environment. This studio is conducted over one semester.

---

**ARCH6103. Dissertation/design thesis (12 units)**

Dissertation/design thesis: an in-depth investigation of urban design or development issues which relate directly to the physical planning problems and potentials of urban areas. The topic chosen should be both academic and practical in nature and a report not exceeding 20,000 words or equivalent is required.

---

**ARCH4004. Urban design (3 units)**

The course covers basic theory and practice of urban design. Topics include: Hong Kong's urban form, buildings and spaces; basic urban design concepts, analysis and approaches; efficiency of urban design and evaluation criteria; case studies.

---

**ARCH6104. Physical environment and site planning (3 units)**

The course reviews theory and methods of land use, site planning and design, and focuses on the interaction with the physical environment. Topics include location and site analyses; land use planning and programme development; environmental standards and facilities; infrastructure for urban and rural development; site formation and landscape planning.

---

**ARCH6105. City planning and design (3 units)**

The course examines the framework for urban planning and practice within which urban design is undertaken and implemented. Case studies will be presented with particular reference to Hong Kong.

---

**ARCH6106. Financial analysis for urban projects (3 units)**

The course develops skills essential for examining financial and marketing aspects of large privately funded urban design projects. Topics include cost and investment analysis for urban design; the financial and commercial context of development; the development process, marketable designs and the budget; urban development goals, resources and policy implications; impact of globalisation.

---

**ARCH6107. CAD in urban design (3 units)**

The course focuses on computer-related tools and techniques in professional urban design practice, and enables designers to fully exploit computers as design and presentation tools: overview of computer graphics, hardware, software and their applications in urban design.

**ELECTIVE COURSES<sup>4</sup>**

---

**ARCH6062. Design of cities (3 units)**

This course reviews historical trends in design of cities in different countries and explores their underlying cultural, spatial, social and economic contexts. Special emphasis will be given to the evolution and future form of cities in the Asia-Pacific region with reference to their physical, functional, political, social and economical developments in recent decades.

---

**ARCH6063. Economics for design and development (3 units)**

This course introduces principles of micro-economics and macroeconomics relevant to the design and development professions. Topics include: constraints and economic choice; demand, supply, returns and cost; land and rent; capital and interest; resources and productivity; economics of firms; banking and financial markets; factor prices; national income and business fluctuations; aspects of design and development decisions.

---

**ARCH6064. Introduction to computers in urban design (3 units)**

This is an introductory course dealing with the following topics: hardware and software basics, file management, network communications, office software; 2-D CAD drafting and 3-D CAD modelling; multimedia; statistics and database tools; presentation and image processing software.

---

**ARCH6065 Introduction to graphics for urban design (3 units)**

Introduction to urban design graphics and computer aided design: an introduction to basic drafting, graphics and computer-related tools and techniques in professional practice.

---

**ARCH6066. Advanced market analysis in urban design (3 units)**

The course focuses on trends in demand and supply of developments, considering location, patterns of regional changes, national economic cycles, technology and quality with a view to evolving marketable design. Emphasis is on evaluation of design process from the perspective of a private developer, emphasizing inter-relationship of land use, efficient form, function and financial returns. Case studies will be presented.

---

**ARCH6067. Location and transport in urban design (3 units)**

This course will focus upon the key determining factors that create the reciprocal relationship between land use, population and building densities and transport. Candidates will be introduced to methods of evaluation of urban morphology. Case studies with particular reference to Hong Kong will be presented.

---

<sup>4</sup> Not all of the courses are offered every year.

**ARCH6068. Techniques in urban design** (3 units)

The course seeks an understanding of logic, methods and skills required in advanced urban design. Emphasis is on key design concepts and applications; evaluation of context, information base and project goals; evaluation and phasing of designs in terms of alternative physical forms, costs, benefits, and practicability; computer aided design.

---

**ARCH6069. Project Management for urban design** (3 units)

The course focuses on key management tasks in the investigations, design, financing, procurement and construction phases of large scale urban design projects. Topics include: value analysis during design; cost planning; resources and design management; procurement systems and implications for productivity; organisation of mega projects; site organisation and management; international projects.

---

**ARCH6070. Research methods for urban design** (3 units)

The course introduces candidates to research methodology appropriate for urban design. Topics include: formulation of research questions; qualitative and quantitative research methods; environmental design attributes and research paradigms; formulation of research proposals; use of computers in urban design research.

---

**ARCH7106. History and theory of landscape architecture I** (3 units)

Illustrated lectures will be given on the historical development of landscape design in its various cultural contexts. Basic theory of design as related to landscape architecture will be dealt with as a basis for the studio course in landscape planning and design. Coursework may include studies on selected topics and a sketch book assignment.

---

**ARCH7108. Ecology and design** (3 units)

The course covers the basic principles of ecology, with special emphasis on urban environments and the impact of construction and land development on natural processes.

---

**ARCH8104. Conservation management and practice** (3 units)

This course focuses on the management problems unique to conservation projects in Hong Kong, Macau, Mainland China and Southeast Asia, and systematically explores the responsibilities of heritage practitioners in carrying out conservation work from project planning and implementation to post-project assessment and maintenance.
