

REGULATIONS FOR THE DEGREE OF MASTER OF BUSINESS ADMINISTRATION (MBA)

These regulations apply to candidates admitted to the Master of Business Administration in the academic year 2018-19 and thereafter.

(See also General Regulations and Regulations for Taught Postgraduate Curricula)

Any publication based on work approved for a higher degree should contain a reference to the effect that the work was submitted to the University of Hong Kong for the award of the degree.

Admission requirements

MBA1 To be eligible for admission to the courses leading to the degree of Master of Business Administration, candidates shall

- (a) comply with the General Regulations;
- (b) comply with the Regulations for Taught Postgraduate Curricula;
- (c) hold a bachelor's degree of this University or another qualification of equivalent standard from this University or from another University or comparable institution accepted for this purpose; and
- (d) have attained a satisfactory level of performance in the Graduate Management Admissions Test (GMAT) or Graduate Record Examinations (GRE);
- (e) provide evidence of post-graduate full-time work experience of at least two years duration for entry to the full-time and part-time streams; or possess at least five years of experience at managerial level on top of prior experience in reaching management ranks for entry to the part-time Executive stream;
- (f) have attained a satisfactory score on TOEFL or IELTS if their qualifications from a university or comparable institution outside Hong Kong where the language of teaching or examination is not English; and
- (g) satisfy the examiners in a qualifying examination, if required.

MBA1A Candidates who do not satisfy the requirements of MBA 1(c) and/or (d) above may in exceptional circumstances be admitted if they

- (a) demonstrate adequate preparation for studies at this level;
 - (b) hold a professional qualification and membership of a professional body accepted for this purpose; or have demonstrated to the Admissions Committee with more than 7 years of exceptional business experience (applicable to part-time stream and full-time (China/Hong Kong Track) candidates only); and
 - (c) satisfy the examiners in a qualifying examination, if required.
-

Qualifying examination

MBA2

- (a) A qualifying examination may be set to test the candidates' formal academic ability or their ability to follow the courses of study prescribed. It shall consist of one or more written papers or their equivalent and may include a project report.

- (b) Candidates who are required to satisfy the examiners in a qualifying examination shall not be permitted to register in the curriculum until they have satisfied the examiners in the examination.
-

Course exemption and advanced standing

MBA3 Exemption of up to four required courses may be granted (normally by examination), except the capstone project, if candidates

- (a) can produce evidence, such as transcript and course syllabus, that a course is equivalent in content to another course taken elsewhere for which a satisfactory grade has been obtained; or
- (b) are holding relevant professional qualifications.

No credits will be given for the exempted course and candidates shall be required to take an approved alternative course of the same credit value.

MBA4 Advanced standing of up to two required courses may be granted (normally by examination), except the capstone project, if candidates

- (a) can produce evidence, such as transcript and course syllabus, that a course is equivalent in content to another course taken elsewhere before admission to the Master of Business Administration Curriculum for which a satisfactory grade has been obtained where exemption of two courses has already been granted according to MBA 3; or
- (b) are holding relevant professional qualifications where exemption of two courses has already been granted according to MBA 3; or
- (c) have completed comparable courses for which a satisfactory grade has been obtained at postgraduate level.

Advanced standing will be granted on a case-by-case basis at the discretion of the Board of Faculty. Being exempted in two courses does not imply the granting of advanced standing. No credits will be given for the advanced standing granted. Credits granted for advanced standing shall not be included in the calculation of the GPA but will be recorded on the transcript of the candidate.

MBA5 The credits granted for exemption and advanced standing according to MBA 3 and MBA 4 shall not exceed a maximum of 50% of the total credits (i.e. 60 credits for full-time curriculum; 54 credits for part-time curriculum) and advanced standing shall not exceed 20% of the total credits. No course exemption and advanced standing will be granted for the part-time Executive stream.

Award of degree

MBA6 To be eligible for the award of the degree of Master of Business Administration, candidates shall

- (a) comply with the General Regulations;
- (b) comply with the Regulations for Taught Postgraduate Curricula; and
- (c) complete the curriculum and satisfy the examiners in accordance with the regulations set out below.
-

Period of Study

MBA7 The curriculum shall normally extend over two academic years of part-time study, or fourteen months of full-time study. Candidates shall not be permitted to extend their studies beyond the maximum period of registration of four academic years of part-time study or twenty-six months of full-time study, unless otherwise permitted or required by the Board of the Faculty. Candidates who have been granted advanced standing under Regulation MBA 4 are permitted to complete the curriculum in less than two academic years of part-time study, or not less than one academic year of full-time study. Candidates who have been granted leave of absence are also required to complete their study within the specified maximum period.

MBA7A The curriculum of the part-time Executive stream shall normally extend over a period of two to three academic years. In exceptional circumstances, candidates may complete all curriculum requirements within a maximum period of forty-eight months from the initial matriculation date of the curriculum.

Completion of the curriculum

MBA8 To complete the curriculum, candidates shall

- (a) satisfy the requirements prescribed in TPG 6 of the Regulations for Taught Postgraduate Curricula;
 - (b) follow instruction on the syllabuses prescribed, participate in activities which form part of the curriculum, and complete all written and practical work as may be required; and
 - (c) satisfy the examiners in the written presentations and practical work prescribed for each course.
-

Assessment

MBA9 Candidates shall satisfy the examiners in all the prescribed courses as required in the syllabuses. Examinations shall normally be held at the end of each course, unless otherwise specified. Only passed courses will earn credits.

MBA10 Candidates who have failed a required course shall be required to sit for re-examination or retake the course. Candidates may take another elective course as substitution if the failure is an elective course.

MBA11 Candidates who have failed a total of more than three examinations/assessments or re-examinations/re-assessments during the entire period of study of the curriculum shall be recommended for discontinuation under the provisions of the General Regulations G 12.

MBA12 Candidates shall not be permitted to repeat a course for which they have received a passing grade for the purpose of upgrading.

MBA13 There shall be no appeal against the results of examinations and all other forms of assessment.

Grading systems

MBA14 Courses shall be graded according to letter grades, their standards and the grade points for assessment as follows:

<i>Grade</i>	<i>Standard</i>	<i>Grade Point</i>
A+		4.3
A	Excellent	4.0
A-		3.7
B+		3.3
B	Good	3.0
B-		2.7
C+		2.3
C	Satisfactory	2.0
C-		1.7
D+		1.3
D	Pass	1.0
F	Fail	0

MBA14A Under the curriculum of the part-time Executive stream, all courses follow the letter grade system except one course that is graded according to the 2-tier system of “Pass” or “Fail”, and will not be included in the calculation of CGPA.

Assessment results

MBA15 On successful completion of the curriculum, candidates who have shown exceptional merit may be awarded a mark of distinction, and this mark shall be recorded in the candidates’ degree diploma.

SYLLABUSES FOR THE DEGREE OF MASTER OF BUSINESS ADMINISTRATION (MBA)

These syllabuses apply to candidates admitted to the Master of Business Administration in the academic year 2019-20 and thereafter.

CURRICULUM STRUCTURE

REQUIRED COURSES

Both full-time and part-time curricula consist of twelve required courses (including ten 6-credit courses [one of which is a capstone project] and two 3-credit courses).

ELECTIVE COURSES

Both full-time and part-time candidates must read seven 6-credits elective courses, in addition to the required courses. A list of electives will be announced at the beginning of each year. Candidates may also take up to two electives courses from taught postgraduate curricula offered by the Faculty of Business and Economics under the advice and approval of the Programme Directors concerned.

ASSESSMENT

Candidates shall normally be examined at the end of each course, unless otherwise specified. Assessment may include any combination of written assignments, project reports, written papers, class participation, written examination, or any other assignment which may be required as part of a course. In order to successfully complete a particular course, besides fulfilling the assignment and examination requirements of respective lecturers, candidates will also have to attain a minimum attendance requirement of 70% for each course.

DESCRIPTION FOR POSTGRADUATE COURSES OFFERED BY THE MASTER OF BUSINESS ADMINISTRATION CURRICULUM

The courses listed below will not be necessarily offered every year. Coursework and examination ratio may vary according to course instructors as shown in the respective course outlines.

REQUIRED COURSES

PMBA6013 Accounting for Business Decisions (6 credits)

The main objective of this course is to promote an in-depth understanding of fundamental accounting concepts and practices as well as to enhance your ability to apply such concepts in various decision-making contexts. Topics covered in this course include not only technical aspects of accounting in terms of how financial information is prepared, but also reasoning for why such information is relevant to the management of a firm. In addition, the course covers essential financial statement analysis skills and cost management issues, which go beyond typical financial accounting topics. Assessment: 50% coursework, 50% examination

PMBA6015 Business Communications (3 credits)

This course is a half course and therefore engages in an intensive investigation of the nature and function of communications within an increasingly complex and multi-cultural context of international business. It investigates the crucial role of written and oral communication and also an investigation of cross-cultural communication, negotiation and communication in a business crisis situation. In addition, on the practical side we shall be looking at some requirements such as the writing of resumes, the writing of application letters and interviewing techniques. Assessment: 100% coursework

PMBA6065 Business Data Analysis (6 credits)

This course is designed to provide you with the necessary skills and knowledge to lead and manage data-driven projects in all business disciplines. Topics include, but are not limited to, principles of data analytics for business, basic techniques for analyzing data, and an introduction to predictive and prescriptive analytics. The emphasis throughout the course is on concepts and reasoning. Through a combination of lectures, case studies, computer workshops and discussions, you should acquire, or reacquire, some specific skills in data analysis for decision making, but more importantly, become a more informed and critical user of those tools in business settings. You should become more confident in asking critical questions on the quantitative work done, and develop a critical view on how data analytics can become a competitive advantage for organizations. Assessment: 100% coursework

PMBA6063 Business Ethics (3 credits)

This course addresses learning, communication, and ethical reasoning skills that impact professional performance. In this class we hope to show that we are all susceptible to unethical behavior, and therefore should take time to avoid situations wherein unethical behavior is incentivized. Specific attention will be paid to ethical frameworks and the opportunity for

informed self-reflection in applying ethical perspectives in a business context. Assessment: 100% coursework

PMBA6068 Capstone Project (6 credits)

The Capstone Project requires students, working in groups, to conduct a detailed analysis of a company. Students must select a specific company, normally a listed company for which both financial and operations data are publicly available, at the beginning of their programme study, and identify the important challenges facing the selected company, develop an in-depth analysis, formulate strategic options, and make strategic recommendations to tackle the challenges over the course of the programme by applying the knowledge they gain in various core courses. The Capstone Project will last for the entire period of the programme, involving the submission of a preliminary report, the submission of a final written report, and an oral presentation. Assessment: 100% coursework

PMBA6011 Competitive Strategy (6 credits)

This course will focus on formulating and implementing business strategy to achieve superior performance. The purpose of the course in strategic management is to make participants familiar with the core concepts and techniques that function as foundations for formulating and implementing successful strategies. The main focus of the course is to learn how to use and apply these skills when judging complex management situations. The distinctive contribution of the strategic management course is that it integrates the different perspectives that you have already learned and allows you to apply these perspectives to complex and realistic general management situations. The ultimate goal of this course is therefore to develop your judgment as a general manager. Assessment: 100% coursework

PMBA6003 Corporate Finance (6 credits)

This course aims to provide students with the understanding of (i) financial issues encountered by corporate managers, decision makers and investor, (ii) financial models and analytical techniques to evaluate the investment and financing decisions of firms, (iii) practical issues about those corporate finance theories, and (iv) the recent development of financial management tools and strategies. Assessment: 70% coursework, 30% examination

Prerequisite: PMBA6013 Accounting for Business Decisions &
PMBA2963 Managerial Economics

PMBA6012 Global Economy (6 credits)

This course provides a basic framework for understanding international macroeconomics and trade. It analyzes the structure and performance of the macro-economy, as well as the implications of macroeconomic policies in both the domestic and global contexts. Topics include business cycles and economic growth, fiscal and monetary policies, exchange rate and trade policies, etc. Special attention will be paid to the economies of the Chinese mainland and Hong Kong, as well as current economic issues. Assessment: 60% coursework, 40% examination

Prerequisite: PMBA2963 Managerial Economics

PMBA6042 Information and Operations Management (6 credits)

Information technology (IT) enables new patterns of commerce and affects how buyers buy and sellers sell, how firms interface with their customers and suppliers, and how activities are organized internally within the firm, and how individuals utilize technologies. The integration of technology, individuals, and business processes makes it pertinent for the managers and leaders of today and tomorrow to be able to understand and communicate the strategic potential of these tools across the entire supply chain. This course integrates the fundamental principles of information systems and operations management to cover key aspects of IT management, user behavior, and a firm's operating process flow and its supply chain. Assessment: 85% coursework, 15% examination

PMBA2963 Managerial Economics (6 credits)

Managerial economics is a branch of economics that applies microeconomic analysis to business decisions. To effectively manage a company, the manager needs to have a good understanding of cost, pricing, market power, competition strategies and internal organization. We will gradually develop these economic concepts and show how they can be applied to managerial decisions. The analysis and principles that we learn in this course will serve as building blocks for the understanding of other business subjects such as accounting, marketing, corporate finance and human resource management. Assessment: 55% coursework, 45% examination

PMBA6041 Organizational Leadership (6 credits)

This course provides students with an opportunity to critically appraise and reflect upon the subject of management from different perspectives including, leadership, organisational behaviour, organisational effectiveness, strategy development, shareholders and stakeholders theories. An emphasis is placed upon drawing a direct relevance to the functional disciplines of operating a business in the real world as well as affording students the opportunity to get grounded in these management perspectives. Assessment: 100% coursework

PMBA6010 Strategic Marketing Management (6 credits)

This course is designed for MBA students with limited background in marketing. Concepts and analytical tools related to value creation and delivery and needed for making marketing decisions will be covered. Contexts for discussion and learning will be global with special reference to markets in Asia and China. The course will be delivered in a workshop mode via a blend of interactive class discussion & exercises and case analyses. Assessment: 100% coursework

ELECTIVE COURSES

PMBA6036 Advanced Corporate Finance (6 credits)

This course consists of three parts. Part I covers financing needs and capital structure. Part II develops tools needed for valuing investment projects and companies. Part III deals with the concepts of options and derivatives and their applications in corporate finance and risk management. The topics to be covered include: Capital Structure: Theory and Practice, Cost of Capital, Valuation: WACC versus APV, Dividend Policy, Convertible Debt, Options, Risk

Management, Real Options for Valuation and Strategic Decisions. Assessment: 60% coursework, 40% examination

Prerequisite: PMBA6003 Corporate Finance

PMBA6082 Artificial Intelligence for Business Leaders (6 credits)

This course will aim to provide students with an overview of the main branches of Artificial Intelligence (AI) as well as explore use cases and practical business implementation within different industries and technologies to better understand the coming AI Human-centric revolution. Students will be able to identify and leverage AI to enhance and/or disrupt business models and whole industries while keeping in mind social and ethical dimensions for the greater good of the world. The course is also intended to aid the thinking and personal development of students so that they themselves are better able to adapt to the future job market and shape the societal systems of tomorrow. Assessment: 60% coursework, 40% examination.

PMBA6033 Asian Business and Economies (6 credits)

This is a MBA course focusing on important and timely business, economic, political, cultural and technological issues facing various Asian economies. The topics to be covered include Asian business management practices, international trade, foreign investment, high-technology industries, international agreements, political economy, international and cross-cultural negotiations, Asian culture and branding, regional and global supply chains and economic growth. Assessment: 100% coursework.

PMBA6072 Asian Financial Markets and Institutions (6 credits)

This course will explore global financial markets and institutions, with a student driven focus on Asia. We will discuss primary and secondary markets and the role of intermediaries in their various forms, and the conflicts of interest inherent in that role. The course will focus in depth not only on the products that are traded on global financial markets, but also on the institutions that regulate the products and those that buy, sell or otherwise interact with those products.

This course will also encourage students to become more knowledgeable about the complexity that determines headline numbers. We will use documentation involved in a variety of financial products to explore these dynamics, gaining awareness that bargaining power, negotiating strategies, and the rights, privileges and liabilities of each party culminate in these documents. Assessment: 100% coursework

PMBA6020 Branding and Communications (6 credits)

Throughout the course, the concept of branding will be thoroughly examined in a holistic manner. The literatures written by Kotler, Aaker and Levitt will be frequently referenced, balanced by an interpretation of the instructor's practical experience. Case studies from a global as well as Asian perspective will be cited in order to provide students with relevant insights to brand management in their work place. This course combines the most critical theories as well as the most current marketing topics including "branding in the digital age" and "brand management during economic turmoil", "CSR and sustainability", etc. Assessment: 100% coursework

Prerequisite: PMBA6010 Strategic Marketing Management

PMBA6049 Business and Economics of G-20 and Asia (6 credits)

This course focuses on important and timely business, economic and political issues facing various G-20 economies. The topics to be covered include business management practices, international trade patterns and trade policies, foreign direct investment, exchange rates, high-technology clusters and industries, international agreements, political economy, regional and global supply chains, economic growth, etc. Assessment: 100% coursework

PMBA6061 Business Intelligence and Big Data (6 credits)

With the rapid advances in information technologies, massive amount of data, often known as “big data” are being generated at an unprecedented speed. There are ample opportunities for business organizations to gain managerial and strategic insights by gathering, cleaning, and analyzing these data, a process known as “business intelligence.” The purpose of this course is to introduce a basic understanding of what business intelligence and big data are and how they can be applied to make intelligent business decisions and strategies. This course focuses on both the technical aspects and the managerial aspects of business intelligence and big data analysis. Assessment: 70% coursework, 30% examination

Prerequisite: PMBA6065 Business Data Analysis

PMBA6050 Business Lab – Ideas Incubation Programme (6 credits)

The Business Lab provides a unique opportunity for students to pursue their passion for entrepreneurship and innovation, to use the knowledge and tools learned throughout the MBA programme and to develop a solid understanding of the overall start-up setting within a “safe environment”. The concepts introduced throughout the sessions provide the students with a set of successful frameworks and serve as a reality check. Assessment: 100% coursework

PMBA6073 Business Model Development & Strategic Innovation (6 credits)

This course will examine how a firm can better design its business model and how innovative thinking affects the competitive dynamics of markets, how consumers perceive innovations from firms, and how firms can create and implement strategies to maximize their likelihood of success. We will explore how firms can strategically innovate in their businesses and how they can be successful in discovering a new strategic position. We will also explore the question of how to respond to an innovation that seems to be disrupting your business. The course should be of particular interest to those interested in managing a business in both high technology and low technology contexts, and to those interested in consulting. Assessment: 100% coursework

PMBA6028 Business Networking – Managing Social Networks for Business Success (6 credits)

Given the importance of social networks and their sometime counter-intuitive influence on business effectiveness, the main objective of this course is to introduce concepts and findings in the areas of social capital and social network analysis in order to advance students’ understanding on how to effectively manage network relations and structures to achieve success in business. Assessment: 100% coursework

PMBA2989 Business Strategies in China and India (6 credits)

The course addresses strategy for China and India at three levels. The first is how to operate and market in these countries so concerns itself with ground level managerial skills. The second is how Chinese and Indian companies are managed, including financing, innovation, people skills so concerns itself with levels of company capability. The third is how Chinese and Indian companies globalize and compete with incumbent multinationals. Basically, the course is a strategy course set in China and India. Assessment: 100% coursework

PMBA6027 Business Valuation (6 credits)

This course is designed to help students conduct valuation using financial statements. The course introduces concepts, tools and skills used for analyzing financial statements. Topics cover strategy, accounting and financial analysis; forecasting financial performance; valuation theory and practice; as well as business valuation in a private equity setting. Students will have the opportunities to apply the concepts and skills in analyzing financial statements and valuing real companies in the course. This course will be useful for students who are interested firms' valuation, particularly useful for students who are interested in finance and entrepreneurship. Assessment: 80% coursework, 20% examination

Prerequisite: PMBA6013 Accounting for Business Decisions

PMBA6059 China Business Environment (6 credits)

This course examines the challenges and opportunities that a rising and rapidly changing China has provided for various business corporations, i.e. multinational corporations, domestic state-owned enterprises, entrepreneurial firms. It delineates the complexity of contemporary China with respect to economic, technological, political, social and cultural environments and how it influences corporations in a wide range of industries. Based on in-depth discussions of extensive business cases, it aims to provide students with analytical frameworks of how managers navigate in the China business environment and address the challenges and threats. Assessment: 100% coursework

PMBA2229 China Marketing (6 credits)

The focus of the course is to analyse and examine the China market from the perspective of marketers who are either planning to enter the market or to further increase their market presence. There will be less emphasis on analyzing the success and failure of Chinese enterprises doing business abroad. Nevertheless, selective Chinese enterprises will be studied in the context as a market force that contributes to the intensity of the market competition. Assessment: 100% coursework

Prerequisite: PMBA6010 Strategic Marketing Management

PMBA6074 Climate Change, Production and Trade: Emerging Challenges for Business (6 credits)

This course aims to provide students with insights into the nature of climate change, and the likely consequences of an absence of sufficient adaptation to climate change and inadequately mitigated man-made global temperature changes. The analysis will be framed in the environmental, socio-political and economic contexts in which the public policy debate is taking

place. The approach is necessarily multi-disciplinary. It will look at the economics and political economy of climate change mitigation and adaptation, the physical and social impacts of a hotter earth, and the politics of the allocation of responsibility across nations for addressing the problem. The course will pay attention to national and international policy initiatives on climate change, and the possible implications of policies in this area for international investment and trade. The policy analysis will focus in particular on the implications of this complex set of issues for business. Assessment: 100% coursework

PMBA6066 Competitiveness of Chinese Firm (6 credits)

This course is case-study based and focuses on studying competitiveness of Chinese firms from business positioning, value chain & competitive dynamics. In particular, the course will investigate how Chinese firms quickly learn from cutting-edge business models in advanced industrial economy and create sustainable competitive advantage. The course aims to provide understanding and analytic tools for companies competing in variety of industries such as Automotive, Crowdfunding, Electricity, Energy, Food Processing, Information Technology, Interactive Entertainment, Real Estate, and Telecommunication. It discusses how these companies compete domestically and globally. Their influences upon Hong Kong firms are also important elements of the content. The course will help the students to have a better understanding of the current status of China's competitiveness and future dynamics. Assessment: 100% coursework

PMBA6018 Corporate Governance and Social Responsibility (6 credits)

This course is to provide a multi-faceted overview of the characteristics and unique challenges of governance strategy and practices in Asia. Corporate governance topics include the institutional environment, corporate ownership, family-and state-owned enterprises, board of directors and corporate transparency. Moreover, the topics of social responsibility, nonprofit organizations and social enterprises will be discussed in-depth to bring this course to a forward-looking conclusion. Assessment: 100% coursework

PMBA6004 Creativity and Business Innovation (6 credits)

In this course students will learn how creativity can be harnessed for the purpose of business innovation. It has become a commonplace that business organizations need to innovate to survive in times of global markets, rapid technological development, hyper-connectivity, sustainability concerns, and shifting consumer preferences. The course objectives are to put the students into the shoes of managers in business organizations supporting or developing powerful innovation processes. They learn to distinguish, appreciate, and develop the business models, people, structures, and processes that enable these innovation processes. Assessment: 100% coursework

PMBA6084 Crisis Management in a Global Business Environment (6 credits)

This course will explore the real-time, hands-on process of crisis management that organizations utilize in our global business environment. We will examine how organizations have reacted to past crisis situations and we will simulate real-world crisis situations, as a learning tool. The course will involve lectures, academic research, discussions and guest speakers, all of which will help you prepare for future crisis management situations. Assessment: 100% coursework

PMBA6080 Doing Business on the “New Silk Road” (6 credits)

The course explains the strategies and mechanisms of the Belt and Road Initiative (BRI) and gives an insight to conducting business in the 65+ countries in the 6 development corridors participating. We are covering economic, strategic, legal and practical business issues from highly developed countries to operating in war zones. Starting from the infrastructure projects themselves we are looking holistically into what this means for the economic and social developments, and how the BRI initiative has the potential to re-shape the world. Assessment: 100% coursework

PMBA6060 Entrepreneurship and Ventures (6 credits)

This course aims to provide an overview of the entrepreneurship process by focusing on new venture creation from idea generation, building compelling business model and opportunity recognition to managing new business startup and dealing with the venture capitalists. Students will learn how to develop business models that create new value for customers in a startup venture and will also learn about the values, management, marketing, and financial skills that most often associated with successful entrepreneurial activity. Students then discover and evaluate opportunities, develop possible business models and prepare a venture plan. Assessment: 100% coursework

PMBA6043 Fast Companies (6 credits)

This course is case-study based and combines analyses of strategy, operations, and general management. It features a variety of types of companies from different industries and countries. It prepares students for today's fast-paced world of business by describing competition in fast-paced industries and how the most effective companies cope, introduce students to the analytic and management tools that these businesses now require of managers, and prepare students to function productively with their work colleagues in solving problems and developing strategy. Assessment: 100% coursework

PMBA6077 Financial Crises, Governance and Regulation (6 credits)

Financial crises have been key drivers of regulatory change. From the Great Depression to the Great Recession, policymakers have redefined the dynamics of the financial services industry in efforts to eradicate undesirable practices and events. The economic destruction caused by the most recent financial crisis spurred dramatic action by governments and their appointed financial sector regulators. External oversight and internal governance models have changed significantly as a result. This course will examine several prominent financial crises and consider the regulatory and governance environment both prior to, and post, the event. The primary cause of the crisis will be first explored; the role of the regulator and its response assessed; and the successes and failures of those responsible for governing finance sector organisations evaluated. The course will prepare students for the complexities of the current regulatory environment and what to expect when the next crisis appears. It will also develop a student's understanding of the requirements to successfully govern an organisation at the senior executive and Board level. Assessment: 80% coursework, 20% examination
Prerequisite: PMBA6003 Corporate Finance

PMBA6057 Fund Management and Alternative Investments (6 credits)

This course provides a comprehensive overview of traditional and alternative investment vehicles. For each type of investment, we address two questions: “what is the strategy/practice employed in the industry” and “what are returns and risks revealed through the big data analysis”. A running theme is that asset owners must consider the underlying *factor* risks behind *asset class* or *strategy* labels. Optimally harvesting factor risk premiums—on their own or by hiring others—requires a deep understanding of asset owners’ own profile (risk attitude, liability and liquidity management, etc.) and the agency problem (the interests of asset owners and fund managers are often misaligned). Assessment: 55% coursework, 45% examination

PMBA6032 Global Marketing Management (6 credits)

This course is designed for students looking to deepen their understanding of how to develop marketing strategy through to implementation across global markets. Examining the challenges of entering and operating effectively across international markets, this course covers international marketing objectives, strategies and policies, market selection, distribution channel decisions and management, international marketing mix approaches appropriate to individual markets, and systems of international marketing organisation, planning and control. Assessment: 100% coursework

Prerequisite: PMBA6010 Strategic Marketing Management

PMBA6053 Global Transformations – Asian Dynamics: Challenges for 21st Century Business Leadership (6 credits)

Whereas throughout the 19th century and a good deal of the 20th Europe was the “centre of the universe”: what happened in Europe had an impact on the world. Today Asia is the centre of the universe in the sense that it is the continent where all the major global transformative forces are concentrated – economic growth, geopolitics, energy, food and water security, demographics, etc. Understanding Asian dynamics in the context of global transformations and, in turn, global transformations in the context of Asian dynamics poses one of the most critical challenges of business leadership in the 21st Century. The purpose of the course is to develop and strengthen this understanding. The course is multi-disciplinary, combining: economics, demographics, history and geopolitics, with references to the humanities. Assessment: 100% coursework

PMBA6081 Hedge Funds: Strategies, Business Management & Institutions (6 credits)

This course is an in-depth study of the hedge fund industry. We will study hedge fund trading strategies, the business model of hedge funds, hedge fund investors, as well as the institutional and regulatory framework in which hedge funds operate. The course will evaluate and analyze popular hedge fund trading strategies, including equity strategies (activist, market-neutral, long/short, event-driven, etc.), arbitrage strategies (derivatives, convertible, fixed-income, currency and global macro, etc.), and fund of hedge funds. The course will also analyze the hedge fund business model, including: performance evaluation and risk management; fund compensation and contractual features; transaction costs and market impact; as well as fund raising and marketing. In addition, the course will study the institutional relationships hedge funds have with service providers (prime brokers, custodian banks, etc.) and with regulators. We will also discuss public policy implications and the value of hedge funds in society. This course is designed to provide students with the skills necessary to evaluate hedge fund strategies, and to

develop, manage, and successfully grow a hedge fund business. Assessment: 80% coursework, 20% examination

Prerequisite: PMBA6003 Corporate Finance

PMBA6026 International Business Environment (6 credits)

This course examines the opportunities and challenges that contemporary managers confront when conducting business across national borders. It addresses the complex environment of international business with respect to economic, social, cultural, political, and legal institutions, as well as how these institutions shape business operation in the global market. The course emphasizes greatly on applying theoretical framework in analyzing practical problems confronting managers. Assessment: 100% coursework

PMBA2959 International Field Project (6 credits)

With shifting global economic patterns, the knowledge and field experience in different countries and economic regions is inevitable to be successful on an international and local scale. The international field project is a practical course, which proceeds by visiting companies and institutions to learn about businesses and public services and collect data which serves as a basis for course work. It also gives a cultural perspective and encourages observing international differences in markets, objectives, and operations. Classroom teaching, prereading literature and reviewing current events lay the foundation, but the main pedagogic concept is to analyze companies and institutions visited and extract lessons learned. This can mean the application of best practices back home, the assessment of opportunities for Chinese companies in the visited countries and how to build closer professional and personal ties. Ideally, students already have a sound knowledge of professional practices and some core MBA curriculum subjects, so they can apply and calibrate this in a new context and realities outside the classroom. Further, global contexts will be discussed and the relation to trade agreements and initiatives such as the "One Belt, one Road Initiative". Assessment: 100% coursework

PMBA6083 Interpersonal Dynamics: Leading Teams and Organisations (6 credits)

This course is designed to apply the full range of management and business knowledge to giving professional advice to top-managers. It is a fundamental course for those who work as consultants, prepare for such career, or those who engage with consultants on the client side and want maximize the results of consulting projects. The red line though this course, is to experience and practice every stage of a consulting project in different industry contexts: the lead, the pitch, the client engagement, providing deliverables and final presentation and project closing. Assessment: 100% coursework

PMBA6086 Managerial Accounting and Decision Making (6 credits)

The main goal of this course is to learn how to provide superior information to those running a company so that they can make better decisions and more successfully compete for customers, suppliers, employees, and so forth. The practice of managerial accounting involves innovation, experimentation, diversity, success, and failure as businesses tinker with their managerial accounting systems to create superior information for decision making. Certainly there are “best practices” in managerial accounting; you will learn about them in this course. But remember that a good business is always re-examining its internal information system to see whether the system can be coaxed into providing better, timelier data. Assessment: 50% coursework, 50% examination.

Prerequisite: PMBA6013 Accounting for Business Decisions

PMBA6034 Marketing for Tech-Intensive Industries (6 credits)

This class examines the strategic marketing issues related to high-tech industries, such as customer analysis, segmentation and targeting, product, price, promotion and place. The core of the course is an in-depth analysis of the marketing strategies that companies use to compete in the high-tech industries. This course aims to provide students with a solid understanding of the nature and dynamics of high-tech industries; and with essential knowledge on marketing that allow them to create winning strategies for their organizations competing in this industry. Assessment: 100% coursework

This course focuses on the link between organizational structure and strategy. The core question the course addresses how firms should be organized to achieve their performance objectives. To do so, the course makes heavy use of concepts and tools taught in Managerial Economics and Competitive Strategy. The first part of the course takes the firm's boundary and activities as given and studies the problem of organizational design; topics include incentive pay, decentralization, transfer pricing, and complementarities. The second part examines the determinants of a firm's boundaries and covers such topics as horizontal and vertical mergers, outsourcing, and diversification. Assessment: 45% coursework, 55% examination

Prerequisite: PMBA2963 Managerial Economics &
PMBA6011 Competitive Strategy

PMBA2246 Supply Chain Management (6 credits)

This course focuses on the systems approach to the planning, analysis, design, development, and evaluation of supply chain and logistics management. You will not be learning dry, abstract concepts or theories, but will be given practical situations and case studies from a number of industries to stimulate your thinking for solutions in the analysis of your own organisation's supply chain operation. The learning contents are designed to be comprehensive and illuminative. If you are merely a consumer or customer, this study will help make you more perceptive and more understanding of the constraints and strengths of supply chain management. Assessment: 100% coursework

**PMBA6075 The Emergence of FinTech and Its Impact on Global Finance & Banking
(6 credits)**

Taught as a series of practical courses and guest lectures by industry entrepreneurs and professionals, the course covers the main pillars of the FinTech start-up ecosystem, including peer to peer lending, artificial intelligence, blockchain, big data, crowdfunding, payments etc. and their practical impact on global banking and finance. This course will provide students with the latest empowering and practical knowledge on FinTech enabling them to understand some of the FinTech changes taking place currently in the financial services industry and, most importantly, the trends that will impact the industry in the future. This is a very practical course with a heavy emphasis on guest lectures on the latest industry trends and best practices by industry experts and entrepreneurs rather than theoretical concepts. Assessment: 100% coursework

PMBA6071 Trade Policy (6 credits)

This course aims to give students an overview of how trade policy and international rules on the conduct of trade can exert an influence on business decisions. The course will look at the range of trade and trade-related policies that governments typically employ and what the objectives are of these policy interventions. The course will address these matters in relation both to goods and services. It will also examine the evolution of international agreements designed to regulate trade policy, at the multilateral and regional levels. Particular consideration will be given to the implications for business of the considerable growth of a multiplicity of preferential, discriminatory trading arrangements in recent years. Assessment: 100% coursework
