

REGULATIONS FOR THE DEGREE OF MASTER OF SCIENCE IN MARKETING (MSc[Mktg])

These Regulations apply to candidates admitted to the Master of Science in Marketing curriculum in the academic year 2017-18 and thereafter.

(See also General Regulations and Regulations for Taught Postgraduate Curricula)

Admission requirements

MSc(Mktg)1 To be eligible for admission to the courses leading to the degree of Master of Science in Marketing, candidates shall

- (a) comply with the General Regulations;
 - (b) comply with the Regulations for Taught Postgraduate Curricula;
 - (c) hold
 - (i) a Bachelor's degree with honours of this University; *or*
 - (ii) another qualification of equivalent standard from this University or from another University or comparable institution accepted for this purpose;
 - (d) two years of business or marketing work experience; and
 - (e) satisfy the examiners in a qualifying examination, if required.
-

Qualifying examination

MSc(Mktg)2

- (a) A qualifying examination may be set to test the candidates' formal academic ability or their ability to follow the courses of study prescribed. It shall consist of one or more written papers or their equivalent, and may include a project report.
 - (b) Candidates who are required to satisfy the examiners in a qualifying examination shall not be permitted to register until they have satisfied the examiners in the examination.
-

Award of degree

MSc(Mktg)3 To be eligible for the award of the degree of Master of Science in Marketing, candidates shall

- (a) comply with the General Regulations;
 - (b) comply with the Regulations for Taught Postgraduate Curricula; and
 - (c) complete the curriculum and satisfy the examiners in accordance with the regulations set out below.
-

Period of study

MSc(Mktg)4 The curriculum shall normally extend over one academic year of full-time study. Candidates shall not be permitted to extend their studies beyond the maximum period of registration of two academic years of full-time study, unless otherwise permitted or required by the Board of the Faculty.

Completion of curriculum

MSc(Mktg)5 To complete the curriculum, candidates shall

- (a) satisfy the requirements prescribed in TPG 6 of the Regulations for Taught Postgraduate Curricula;
 - (b) follow the courses of instruction and complete satisfactorily all prescribed written work and field work;
 - (c) satisfy the examiners in all prescribed courses as specified in the syllabuses and in any prescribed form of examination; and
 - (d) have achieved a cumulative GPA of 2.0 or above.
-

Assessment

MSc(Mktg)6 Candidates shall satisfy the examiners in all the prescribed courses as specified in the syllabuses. Examinations shall normally be held at the end of each course, unless otherwise specified. Only passed courses will earn credits.

MSc(Mktg)7 Candidates who have failed a course shall be required to sit for re-examination or to retake the course. If the failure is an elective course, candidates may elect to take another course as a substitute.

MSc(Mktg)8 Candidates who are unable, because of illness, to be present at the written examination of any course may apply for permission to present themselves at a supplementary examination of the same course to be held at some other time. Failure to sit for supplementary examination as arranged shall automatically result in course failure.

MSc(Mktg)9 Candidates shall not be permitted to repeat a course for which they have received a passing grade for the purpose of upgrading.

MSc(Mktg)10 Candidates who have failed in the assessment/examination or re-assessment/re-examination of more than two courses during the entire period of study of the curriculum shall be recommended for discontinuation under the provisions of General Regulations G12.

MSc(Mktg)11 There shall be no appeal against the results of examinations and all other forms of assessment.

Grading system

MSc(Mktg)12 Courses shall be graded according to the following grading system:

<i>Grade</i>	<i>Standard</i>	<i>Grade Point</i>
A+		4.3
A	Excellent	4.0
A-		3.7
B+		3.3
B	Good	3.0
B-		2.7
C+		2.3
C	Satisfactory	2.0
C-		1.7

D+		1.3
D	Pass	1.0
F	Fail	0

Assessment results

MSc(Mktg)13 On successful completion of the curriculum, candidates who have shown exceptional merit at the completion of the curriculum may be awarded a mark of distinction, and this mark shall be recorded in the candidates' degree diploma.

SYLLABUSES FOR THE DEGREE OF MASTER OF SCIENCE IN MARKETING (MSc[Mktg])

These syllabuses apply to candidates admitted to the Master of Science in Marketing in the academic year 2019-20 and thereafter.

CURRICULUM STRUCTURE

Candidates must read a total of ten courses, each carries 6 credits, comprising five core courses (inclusive of one capstone course) and five elective courses. A list of electives will be announced at the beginning of each module. Candidates may take up to two elective courses from other taught postgraduate curricula offered by the Faculty of Business and Economics under the advice and approval of the Programme Directors concerned.

Not all the courses listed in the syllabuses will necessarily be offered each academic year.

CORE COURSES

MSMK7001 Strategic Marketing Management (6 credits)

The course is designed to expose, involve and challenge participants in the complexities of managing key marketing processes for better firm performance. It pays special reference to firms in Hong Kong, Asia, and China with their unique marketing strategies and practices. Cutting-edge knowledge and up-to-date insights with USA and European firms will be shared in the course. It covers fundamental concepts in marketing strategy as well as cutting-edge marketing concepts, tools and strategies in today's marketplace. The course will reinforce the need for corporate marketing ethics including product safety and the issue of sustainability.

MSMK7002 Consumer Insights (6 credits)

The course focuses on harvesting and applying insights from consumers searching, purchasing and consuming product and services. It centers on the consumer psychological states at the moment of their judgement and decision-making. Seemingly minor incidents and the subtle contextual cues in daily life can trigger these psychological states and exert substantial impacts on purchase, consumption, and investment. This course appreciates key trendy consumption phenomena in Hong Kong and China consumer market (e.g., microphilanthropy, experiential consumption, anthropomorphism), analyze these phenomena from the perspective of in-depth psychological mechanisms, and explore the impact of marketing efforts on consumer reaction using the new technical tool of eye-tracking. The course covers consumer goods, business products, and services. It is offer insights to improve firm competitiveness by developing unique consumer-focused strategy and tactics.

MSMK7003 Applied Marketing Research and Metrics (6 credits)

The course is to provide a cutting-edge understanding of marketing research methods in today's marketplace. It will focus on how both qualitative and quantitative aspects of marketing research can help managers to address substantive marketing problems. The course emphasizes the basic methodologies (survey, experiments), as well as introduces a variety of techniques (eye-tracking and digital analytics), and demonstrates how research results can be used to develop innovative marketing strategies. In sum, it combines insights of conventional marketing research with the cutting-edge development in our digital era.

MSMK7004 Marketing on the Internet (6 credits)

The internet has become a central part of modern societies and has significantly altered the shape and scope of individual consumer behavior and business practices. This course covers topics in applied internet marketing including classic e-commerce, internet advertising, digital consumer behavior, mobile marketing, social media strategies, and network platforms. The goal of this course is to provide an understanding of consumer behavior and marketing strategy in the digital space that stresses theory and fundamental concepts and goes beyond simple tactics. It covers conceptual insights and empirical toolkit so students can development innovative and cutting-edge internet marketing strategies.

MSMK7005 Business Model Design and Marketing Innovation (Capstone course) (6 credits)

This course is the capstone course for the Master of Science in Marketing programme. As such, it holistically integrate all marketing assets and resources a firm has and examine how it can better redesign its business model and how innovative thinking affects the competitive dynamics of its markets. By anchoring on how consumers perceive brand stature and innovations of firms, and how firms can create and implement various price, product and distribution strategies to maximize its success. It explores how firms can continuously innovate be successful in new strategic position in the marketplace. The course applies to all firm types with special emphases for those interested in consulting in strategic marketing.

MSMK7011 Service Marketing and Management (6 credits)

This course is designed to help students acquire the necessary knowledge and skills to achieve service excellence in an organization. The course materials are equally applicable to organizations in service industries (e.g., banks, transportation companies, hotels, hospitals, educational institutions, professional services, telecommunication, etc.) and to organizations that depend on service excellence for competitive advantage. It considers service excellence as a corporate strategic vision and views effective service strategy from an integrative perspective that covers customers, employees, and operations. The course covers: understanding and managing customer expectations and evaluations of services; designing services that meet or exceed customer expectations; delivering and performing quality services through people and operations; pricing of services; managing customer complaints and service recovery; and building and managing customer relationship. Students will also learn effective services marketing and management tools such as service audit through gap analysis, service quality survey, customer satisfaction survey, and service blueprinting.

MSMK7012 Global Technology and New Product Strategies (6 credits)

The course is designed to cover global technological trends and how it affects new product strategies in firms. It enables participants to understand the variety of technologies (Nano, material science, digital, neural psychology, medical sciences etc.) and how they affect firm innovations (including disruptive, breakthrough, incremental, affordable and reverse innovation). Through firm case studies, participants should gain knowledge about complex issues involving technology development and management. It pinpoints how different types of firms (entrepreneur, SMEs and large corporation) can monitor and harvest these technology advances in their new product/service development. It covers market learning, R&D and marketing interface, unique characteristics of new service development (NSD) such as co-creation, product/service launch.

MSMK7013 Branding Strategy (6 credits)

This course is aimed at bridging the academic world and the business world. Indeed, “branding” is an extensively researched topic and also a day-to-day management subject. Throughout the course, the concept of branding will be thoroughly examined in a holistic manner. The contemporary literatures on branding strategy will be frequently referenced, balanced by an interpretation of the instructor’s practical experience. Case studies from a global as well as Asian perspective will be cited in order to provide students with relevant insights to brand management in their work place. This course combines the most critical theories as well as the most current marketing topics including “branding in the digital age” and “brand management during economic turmoil” and “CSR and sustainability”.

MSMK7014 China Marketing (6 credits)

This course focuses on marketing strategies in the fastest growing market in the world, China. It covers a full range of topics including key market knowledge in China, including characteristics of consumers, city markets in China and unique marketing strategies for firms operating in China. It provides participants with a fundamental, current and multi-dimensional understanding of China so as inspire them and on insights and complexity in managing marketing in this vast and ever-changing marketplace. Substantial cases of marketing strategies adopted by international corporations in China will be thoroughly examined. Selective Chinese enterprises will be studied in the context as a market force that contributes to the intensity of the market competition of domestic enterprises or multinational corporations that have an interest to learn more about China and the China market.

MSMK7015 Advertising and Integrated Marketing Communication (6 credits)

This course approaches the integrated marketing communication (IMC) as a cross-functional process for creating profitable relationships between customers and corporations. It focuses on how firms can strategically design and execute messages to consumers and general public. It also examines ways for firms to engage and encourage dialogues with consumers through different digital media. Participants will learn how best to integrate marketing communication elements (advertising, social media, public relations, sales promotion, event marketing, direct marketing, and selling) to enhance brand loyalty and advance firm successes. It will cover theoretical framework, firm practices as well as cases to help participants learn how to develop effective IMC plans.

MSMK7016 Global Marketing (6 credits)

The course is designed to develop participants’ understanding of and ability to design effective global marketing strategies for firms. It covers topics of global market selection; target market segmentation and consumption characteristics as well as institutional (socio-cultural) complexities in different markets. Firm strategic issues in global marketing such as setting up R&D centres, new products, standardization versus localization in marketing strategies will be extensively discussed. Through theoretical frameworks, best corporate practices and mistakes as well as real-life case, the course helps participants to sharpen their knowledge of and insights in developing effective marketing strategies in today’s globalizing economy.

MSMK7017 Organizational Leadership (6 credits)

The ability to manage people is a critical managerial skill. All managers have to manage people – they have to motivate and discipline followers, to maintain their commitment, and to coordinate them in a group setting. The core objective of this course is to expose students to major concepts and theories for

understanding and managing human behavior in the workplace, which is important for both the short-term and long-term viability of any organization today. Upon finishing this course, you will gain a better understanding of how individuals, teams, and organizations function, and, more importantly, how to manage social relationships at work and motivate employees to dedicate full efforts to their jobs for reaching their personal and organizational goals.

MSMK7018 Selective Topic in Marketing Strategy (6 credits)

The course is flexible in content that tailored to the expertise of visiting faculty members. It is designed to supplement gaps in knowledge in marketing strategies that students may have. It covers a range of potential topics that include pricing, distribution, retailing, brand acquisition and social issues in marketing. The pedagogy would be similar and at a high quality level commensurate of other electives in the programme. It covers the theory framework, best firm practices and failures, key topics of interest, social and ethical issues. Cases, cutting-edge knowledge and real-life examples will be used extensively.

MSMK7019 Entrepreneurial Marketing (6 credits)

Entrepreneurship is both an exciting and a big topic. This course aims to provide an overview of the entrepreneurship process by focusing on new venture creation from idea generation, building compelling business model and entrepreneurial marketing. While traditional marketing is defined by customer orientation, entrepreneurial marketing is defined by customer development and innovation orientation. Students will learn how entrepreneurs should interact with potential customers with activities like designing minimum viable products and conducting customer development and validation process.

MSMK7020 International Study Field Trip (6 credits)

This course is designed to provide students an opportunity to acquire first-hand knowledge of international marketing management. Experiential learning and knowledge exchange will be applied throughout the study field trip to develop students' understanding of international marketing environment in a different cultural context, help them construct a global perspective, provide them with the opportunity to analyse a business organization of their interest, and to apply and integrate the marketing concepts they have learnt during their studies in the programme. Firm visits and cultural related activities will be arranged during the study field trip to arouse students' awareness in cultural diversity and enhance their understanding of how culture can impact international marketing strategy.

MSMK7021 Big Data Consumer Analytics (6 credits)

Consumers leave a massive digital trail through mobile devices, social media, transactions, and information communication technologies (ICT). Companies and organizations in all industries face this plethora of consumer data and are looking to turn it into value through advertising and better products and services. This course looks to introduce students to the various methods and strategies to make sense of the data. We will cover topics including advance and Big Data predictive analytics, machine and deep learning, text mining and analysis, image and video analysis, and geospatial and mobility analytics. Students will have real hands-on practice exercises with these methods, learn how to generate insights from large and unstructured data, and build an understanding of its strategic relevance in creating sustainable competitive advantage. The course will also bridge these technical methods with social sciences and consumer behavior. We will cover a number of case studies, with an emphasis on Asia, in sundry industries including retailing and e-commerce, advertising, FinTech and retail financial sectors, telecommunication, and transportation and smart nations. Finally, we will discuss the

interwoven dependencies on the legal frameworks with Big Data, including issues relating to privacy, regulations, rights, consumer reactions and adherence to data legislation in different markets.

MSMK7022 Technology Innovations in Retail Banking and Consumer Finance (6 credits)

The FinTech movement is considerably changing the financial sector. In particular, there has been considerable disruptions in retail banking and consumer finance coming from technology companies, the “TechFins”, and from traditional financial institutions, the “FinTech”. These efforts have helped to give access to financial services in un- and under-banked consumers, provided novel products and services to mature markets, and helped build financial access across borders. This course looks at how technological advances and regulatory policies have created opportunities in different markets, with an emphasis in China, Asia, ASEAN, and the region. We will discuss how retail banking and consumer financial products and services including microfinance, peer-to-peer lending, crowd-funding, digital payments, digital banking, and insurance are being affected, and, at times, disrupted, by Big Data, AI, blockchains/cryptocurrencies, and smartphones. Furthermore, the course looks at how these omni-channel and technology-based approaches are fundamentally changing consumer behavior of banked, un-bankable, and under-banked consumers. We will also look at the direct and unexpected societal and economic impact of these innovations. Students will get hands-on experience with credit scoring using non-traditional data. Finally, teams will create their own blockchain of their own design.

ASSESSMENT

Candidates shall be assessed for each of the courses for which they have registered, and assessment is normally conducted in the form of coursework assessment (50-100%) and examinations (0-50%), unless otherwise specified by the course instructor.
