

REGULATION FOR THE DEGREE OF DOCTOR OF BUSINESS ADMINISTRATION [DBA]

These regulations apply to students admitted to the curriculum of Doctor of Business Administration in the academic year 2021-2022 and thereafter.

(See also General Regulations)

Admission requirements

DBA1 To be eligible for admission to the degree of Doctor of Business Administration, candidates shall

- (a) comply with the General Regulations;
- (b) hold a master degree (or above), preferably in business and related field, of this University or another qualification of equivalent standard from this University or from another University or comparable institution accepted for this purpose;
- (c) possess at least twelve years of experience at managerial levels on top of prior experience in reaching management ranks; and
- (d) satisfy the examiners in a qualifying examination, if required.

DBA2 Candidates who do not satisfy the requirements specified in DBA1 above may in exceptional circumstances be admitted subject to the approval of the Board of the Faculty of Business and Economics, if they have

- (a) demonstrated adequate preparation for studies at this level;
 - (b) demonstrated to the Admission Committee that they possess more than twelve years of exceptional business experience at senior management level;
 - (c) a professional qualification and membership of a professional body accepted for this purpose; and
 - (d) satisfied the examiner in a qualifying examination, if required.
-

Registration

DBA3

Successful candidate shall in the first instance be granted provisional registration for the DBA degree, such registration to be confirmed only when successful candidates satisfy the requirements set out in regulation DBA10 below.

Award of degree

DBA4 To be eligible for the award of Doctor of Business Administration, candidates shall

- (a) Comply with the General Regulations; and
 - (b) Complete the curriculum and satisfy the examiners in accordance with the regulations set out below.
-

Period of study

DBA5 The curriculum shall extend over a minimum of four academic years and a maximum of six academic years on a part-time basis. A period of study fewer than four academic years can be granted on exceptional cases if the candidate has fulfilled all the requirements to ensure the award of degree. Candidates who have been granted leave of absence under regulation DBA6 are also required to complete their study within the specified maximum period.

Leave of absence

DBA6 A candidate who wishes to be absent from the approved course of study or research shall be required to submit a written application for leave of absence. Study leave may be granted for the purposes of study outside the place where courses are delivered and non-study leave may be granted when a candidate is best advised for personal, health or other reasons to have time completely away from his/her academic responsibilities. Unless special circumstances warrant an exception, leave of absence under both categories shall not normally be granted for a cumulative period of more than twelve months for the entire period of study. Any period of leave granted shall be counted towards the period of study and any period of non-study leave granted shall result in the extension of the period of study by the period of absence.

Completion of curriculum

DBA7 To complete the curriculum, candidates shall

- (a) satisfy the examiners in the coursework for the degree as set out in the syllabuses;
- (b) complete, to the satisfaction of the examiners, a thesis as specified in regulation DBA12 below; and
- (c) satisfy the examiners at the oral examination.

Coursework requirements

DBA8 Candidates shall be required to take courses and satisfy the coursework requirements as prescribed in the syllabus. The approved course of study and research includes a compulsory coursework component with formal requirements relating to such coursework being determined, from time to time, by the Policy Board of Postgraduate Education. The coursework requirements must be fulfilled before the candidate is permitted to submit a thesis.

Supervision and progress report

DBA9

- (a) Candidates are required to be supervised directly by one or more supervisors appointed by the Program Supervision Committee, with the primary supervisor being a professoriate staff member;

- (b) Co-supervisors can be arranged from the profession where appropriate;
 - (c) Candidates are required to submit a progress report at six-monthly intervals.
-

Probation and confirmation of candidature

DBA10

- (a) Candidates whose applications are accepted shall be subject to a probationary period, which shall not normally exceed 2 years on a part-time mode. By the end of the probationary period, candidates must have
 - (i) completed the required proportion of coursework prescribed in the curriculum; and
 - (ii) submitted a Research Proposal to the satisfaction of the Program Supervision Committee;
 - (b) At the end of the probationary period, a decision shall be made on whether the candidature shall be confirmed or terminated.
-

Discontinuation

DBA11 A candidate may be discontinued

- (a) if academic progress is not satisfactory; or
 - (b) if the student has failed to meet the requirements as stipulated in this set of regulations.
-

The thesis

DBA12

- (a) The thesis should be at least 40,000 words long (exclusive of tables of cases and statistics, notes and appendices containing material and bibliographies). The thesis topic shall be related to the broad field of business, economics and finance. The thesis must represent an original contribution to applied knowledge and/or the understanding of business or economic phenomenon, and contain material worthy of publication in quality applied outlets.
 - (b) Candidates shall serve written notice of intention to submit a thesis for examination at least 3 months prior to the expected date of submission. The notice shall be accompanied by a provisional thesis title.
 - (c) Candidates shall not be permitted to submit a thesis until all coursework requirements have been satisfied.
 - (d) Candidates shall be examined by the examiners appointed for this purpose on both the thesis itself and at the oral examination.
-

Thesis examination results

DBA13

- (a) Candidates who have satisfied the examiners shall be recommended for conferment of the degree of Doctor of Business Administration.
- (b) Candidates who have not satisfied the examiners in the thesis component:
 - (i) may be required to submit the thesis after making corrections or amendments as required by the Board of Examiners, without a new examination; or

- (ii) may be required to revise and resubmit the thesis for a new examination within a specified period, and may also be required to satisfy the examiners at a new oral examination, or any other examination as appropriate, on the subject of the revised thesis; or
 - (iii) may be required to attend a new oral thesis defense, or any other examination as appropriate; or
 - (iv) may be deemed to have failed, without the option of resubmission.
-

Coursework examination results

DBA14

- (a) Candidates shall satisfy the examiners in all prescribed courses as required in the syllabuses. Examination shall normally be held at the end of each course, unless otherwise specified.
 - (b) Coursework shall be assessed on a pass/fail basis.
 - (c) Candidates who have not satisfied the examiners in respect of the Coursework requirements at the first attempt shall normally be permitted to present themselves for re-examination in the same course or retake the course. Candidates may take another course to make up for the failed elective.
 - (d) Candidates who are unable because of their illness to be present for one or more papers in any written examination may apply for permission to present themselves at a supplementary examination to be held before the beginning of the following semester or academic year. Any such application shall be made in written format within two weeks of the first day the candidates' absence from the examination.
-

Publication based on thesis

DBA15

Any publication based on work approved for a higher degree should contain a reference to the effect that the work was submitted to the University of Hong Kong for the award of the degree.

November 2016

- Global Marketing Market and Product Development
- Branding Strategy and Strategic Pricing

This course is designed to help students develop knowledge and analytical skills for addressing current issues relating to the design and implementation of effective marketing strategies in China and the global market. Selected topics include global market segmentation and targeting, consumption characteristics and socio-cultural complexities in China and global market, new product/innovation development, global branding strategy, strategic pricing, and global communication.

(Assessment: 100% coursework)

DBAP7032 Strategic Marketing Innovation and Model Design (3 credits)

- Marketing Innovation
- Marketing Models and Analytics

This course is designed to help students develop knowledge and analytical skills for addressing current issues relating to how integrating innovative thinking and redesigning marketing model affect the competitive dynamics of markets. Selected topics include global technological trends, innovations (incremental, breakthrough, disruptive, etc.) and firm performance, crowdsourcing, R&D and marketing interface, and marketing model redesign.

(Assessment: 100% coursework)

DBAP7033 Big Data and Business Analytics (3 credits)

- Business Analytics with Big Data
- Decision Making with Uncertainty

The course is designed to equip students with strategic understanding of big data and business analytics, and how they can help businesses to gain competitive advantages in the digital revolution. Selected topics include introduction to big data, introduction to business analytics,

data-driven decision making with uncertainty, and integration of business analytics/big data with business strategy and innovation.

(Assessment: 100% coursework)

DBAP7036 Supply Chain and Logistics Management (3 credits)

- Supply Chain Management
- Manufacturing Operation and Logistics Management

The course is designed to prepare students to apply business strategies, analytical methodologies and information technology in supply chain management. Traditionally industries have focused on operation evaluation and performance improvement of manufacturing process; however, the deficiency of supply chain coordination results in severe downgrade of business competitiveness. With advent of information technology, computers not only improve manufacturing operation and management, but also enhance strategic decision making as well. This course focuses on the systems approach to planning, analysis, design, development, and evaluation of supply chain management.

(Assessment: 100% coursework)

Elective Courses

Candidates must complete a total of 9 credits from any three elective courses (3 credits each) or DBAP7044 (6 credits) plus one elective course (3 credits) from the below courses for elective studies:

DBAP7014 Global Accounting Standards and Practices (3 credits)

- Financial Accounting Principles
- International Accounting Standards and Financial Disclosure
- Accounting Control and Management Behavior

This course covers topics on both financial accounting and management accounting. The first two sub-sections essentially introduce the financial disclosure principles and standards under different financial reporting regimes. It will familiarize the students with similarities and differences of financial disclosure across countries, which is of particular interest for the students with the plans to engage in cross-border mergers and acquisitions or to go public in an overseas stock exchange. The third sub-section emphasize the execution of management strategies. Students will learn about the various mechanisms that can be used, including performance measurement systems and balanced scorecards. These strategies will enable the students to more efficiently allocate resources among firms and within a firm, to incentivize and monitor the managers, as well as to ensure the integrity of the employees, eventually cultivating healthy and productive corporate culture.

(Assessment: 100% coursework)

DBAP7015 Global Financial Innovation (3 credits)

- Financial Derivatives and Alternative Investment
- Financial Innovation and Supervision

This course offers a general introduction to derivative products and alternative investment

channels, together with the request for supervision from related authorities. On one hand, there are significant benefits coming along the process of financial innovation. This course will cover the basics of different types of financial derivatives (e.g. futures, options, swaps and structured products) and alternative investment niches (e.g. hedge fund, commodities and distressed assets), and will also focus the concepts of hedging and arbitrage from the angles of trading strategies and pricing foundations. On the other hand, although financial innovations become increasingly prevalent in the recent decades, they are subject to opaque operating environment and loose regulatory disciplines, to some extent leads to the recent financial crisis. Therefore, the course also highlights the necessity of regulations and supervision in this field.

(Assessment: 100% coursework)

Business creation is both an exciting and a big topic. This course aims to provide an overview of business creation processes by focusing on the dynamics of how the sequence in which multi-dimensional actions can be effectively enacted so as to more likely achieve positive outcomes. Creating businesses have now become very complex. Students will learn to appreciate and build up business concepts, people, structures, pricing, selling, finance and operations capacities which enable the successful business creation processes.

(Assessment: 100% coursework)

DBAP7034 Strategic Information System Management (3 credits)

- Information Technologies Management
- Information Strategies Design

This course is designed to help students develop knowledge and analytical skills for addressing current issues relating to managing information technologies and designing effective information strategies in an organization. Selected topics include information strategy for organizational agility and sustainability, strategic information management in marketing, operations, etc., managing of e-commerce, and challenges in knowledge management.

(Assessment: 100% coursework)

DBAP7035 Services Marketing and Management (3 credits)

- Customer Service Management
- Service Pricing
- Customer Satisfaction

This course is designed to help students develop knowledge and analytical skills for addressing current issues relating to achieving service excellence in an organization. Selected topics include understanding and managing customer service expectations and evaluations, service innovation and design, integrated service strategy, customer participation and value co-creation, pricing of services, managing customer complaints and service recovery, and customer satisfaction and delight.

(Assessment: 100% coursework)

DBAP7044 International Enterprise Management (6 credits)

This course aims to cultivate the global vision and integrated skills of the students, and promote knowledge and culture exchange between the students and the faculty in other leading business schools. This course is featured with intensive cross-cultural elements. It incorporates theories and practices in international financial management and strategic management in a comparative approach. Specifically, it requires the students to conduct case analysis on the representative enterprises at home and abroad, compare their corporate policies, management styles and performance outcomes, and produce a comprehensive case report. Students who elect to complete this course are required to complete a 3-credit course only for elective study.

(Assessment: 100% coursework)

DBAP7049 Advanced Research Methods (3 credits)

This course introduces advanced methods in modern research, with illustrative applications and discussions of academic papers recently published at top journals that utilize such research methods. As there is a rapidly rising trend of conducting research using machine learning based methodology in both theoretical and empirical research in business related fields, this course seriously covers a set of major ML concepts and methods.

(Assessment: 100% coursework)

Research and Enrichment Modules

Candidates must complete a total of 21 credits from below research and enrichment modules and complete the thesis component in 54 credits:

DBAP7046 Research Ethics for Graduate Students (6 credits)

The purpose of this course is to reinforce the importance that The University of Hong Kong places on the preservation of these values in all research conducted at the university. In this course, students will learn essential vocabulary, principles, and practices conducive to the promotion of research integrity in general and in their relevant disciplines. Students can expect to encounter terminology, texts, and tenets that relate to good conduct in the teaching and research professions.

(Assessment: 100% coursework)

DBAP7047 Behavioral Research Methods (3 credits)

This course focuses on qualitative research methods, introducing definition, techniques and applicable scope of the method. It will extend the research capacity of the students from describing and summarizing basic facts and patterns to investigating why and how of decision making, not just what, where and when.

(Assessment: 100% coursework)
