

REGULATIONS FOR THE DEGREE OF BACHELOR OF SOCIAL SCIENCES (BSocSc)

(See also General Regulations and Regulations for First Degree Curricula)

Definitions

SS1⁽¹⁾ In these Regulations, and in the Syllabuses for the degree of BSocSc, unless the context otherwise requires -

‘Core departments’ means the Departments of Politics and Public Administration, Psychology, Social Work and Social Administration, and Sociology;

‘Non-core departments’ means departments, centres, schools and programmes, other than core departments, teaching in the Faculty of Social Sciences;

‘Department’ means any one of the core and non-core departments;

‘Course’ means a course of instruction which normally carries 6 credits or in some cases 3 credits or multiples of 3, leading to one examination paper as defined in the syllabus;

‘Paper’ means one or more of the following tests: a theoretical examination paper, a practical examination paper, an assessment of field practice, a thesis, and a dissertation, or other assignments as prescribed in the syllabus of the course leading to it;

‘Credits’ means the weight assigned to each course relative to the total study load. The number of credits is indicative of the contact hours and/or study time associated with the course on a weekly basis;

‘Pre-requisite’ means a course which candidates must have completed as specified to the satisfaction of the Head of Department before being permitted to take the course in question.

Admission to the degree

SS2 To be eligible for admission to the degree of Bachelor of Social Sciences candidates shall

- (a) comply with the General Regulations;
 - (b) comply with the Regulations for First Degree Curricula; and
 - (c) complete the curriculum in accordance with the regulations that follow.
-

Length of study

SS3 The curriculum shall normally extend over three academic years consisting of six semesters of full-time study, excluding the summer semesters. Candidates shall not in any case be permitted to complete the curriculum in more than four academic years, which being the maximum period of registration.

Completion of the curriculum

SS4 To complete the curriculum, candidates shall:

- (a) satisfy the requirements prescribed in UG3 of the Regulations for First Degree Curricula⁽²⁾;
- (b) enrol in not less than 180 and not more than 216 credits of courses, unless otherwise required or permitted under the Regulations;

⁽¹⁾ This regulation should be read in conjunction with UG1 of the Regulations for First Degree Curricula.

⁽²⁾ The specific requirements applicable to candidates of this degree curriculum are spelt out in the syllabuses.

- (c) follow the required number of compulsory and elective courses as prescribed in the syllabuses of the equivalent of normally 60 credits for each year of study. For each semester, candidates shall select not less than 24 and not more than 36 credits of courses except for the last semester of study;
 - (d) take a maximum of 84 credits of junior level courses and the rest being senior level courses as prescribed in the syllabuses over the entire period of studies;
 - (e) take not less than 48 and not more than 78 credits of senior level courses from a single core department except where otherwise stated in the syllabuses.
-

Selection of courses

SS5 Candidates who wish to change their selection of courses at the beginning of each semester may do so up to 2 weeks after the commencement of the semester. Requests for changes beyond the 2-week deadline will not be permitted, except for medical or other reasons accepted by the Faculty Board, and candidates' withdrawal from any course without permission will be given a failing grade.

Assessment and grades

SS6 Candidates shall be assessed for each of the courses which they have registered. The assessment may take one or a combination of forms as prescribed in the syllabuses and shall normally include the candidates' coursework during the semester. Only those satisfactorily completed courses will earn credits.

SS7 Candidates' performance in a course shall be assessed with the grading system as prescribed in UG5 of the Regulations for First Degree Curricula.

Failure in examination

SS8 Candidates who fail in any course may, as directed by the Board of Examiners, be permitted to present themselves for re-assessment with or without repeating the failed course. The timing and the form(s) of re-assessment shall be decided by the Board of Examiners. Candidates shall not be allowed to repeat a course for which they have achieved a passed grade for upgrading purposes, nor shall they be permitted to repeat a course more than once. The failed grade will be recorded in the official transcripts. The new grade obtained after re-assessment of the same failed course will also be recorded and will replace the previous F grade in the calculation of the weighted grade point averages. As failed courses shall not be credited towards a degree, failed compulsory courses must be re-assessed.

Absence from examination

SS9 Candidates who are unable because of their illness to be present for any written examinations may apply for permission to present themselves for a supplementary examination to be held before the beginning of the first semester of the following academic year. Any such application shall be made on the form prescribed within two weeks of the first day of absence from any examination. Candidates who fail to satisfy the examiners in one or more papers in such a supplementary examination shall be considered under the provisions made in these Regulations for failure at the first attempt at the examination, except that a further supplementary examination shall not be permitted.

Performance assessment

SS10 At the end of each semester, candidates' performance shall be assessed for the purposes of determining

- (a) their eligibility for progression to an award of the degree;
 - (b) their eligibility for the award; or
 - (c) whether they be required to be discontinued from the programme.
-

Progression of studies

SS11 Candidates shall be permitted to progress if they have:

- (a) not exceeded the maximum period of registration; and
- (b) accumulated not less than 30 credits and attained a GPA of 1.00 or above over the first and second semesters; or
- (c) accumulated not less than 30 credits and attained a GPA of 1.50 or above over the third and fourth semesters; or
- (d) accumulated not less than 30 credits and attained a GPA of 1.50 or above over the fifth and sixth semesters; or
- (e) attained a semester GPA of 1.50 or above at the end of each subsequent semester.

Those who have not been able to fulfill the requirements above shall be recommended for discontinuation from the programme under General Regulation G12.

Award of the degree

SS12 To be eligible for the award of the degree of BSocSc, candidates shall have:

- (a) achieved a weighted GPA of 1.00 or above;
 - (b) successfully accumulated a minimum of 180 credits; and
 - (c) satisfied the requirements in UG3 of the Regulations for First Degree Curricula.
-

Degree classification

SS13 A list of candidates who have successfully completed all the degree requirements shall be published in five divisions: First Class Honours, Second Class Honours Division One, Second Class Honours Division Two, Third Class Honours, Pass. The classification of honours shall be determined by the Board of the Faculty at its full discretion by taking the overall performance of candidates and other relevant factors into consideration.

c) Candidates may take at most 12 3-credit courses for the curriculum, while the remaining should be 6-credit or more courses.

3. Course registration

Course registration will take place before the commencement of each semester.

Candidates are advised to consult relevant teachers or Heads of Departments on the suitable combinations of courses and to adhere closely to the normal study pattern. Less suitable combinations of courses may not be permitted because of timetabling difficulties. Courses listed in the syllabuses may not necessarily be offered every year; and depending on the exigencies of staffing, additional courses may be offered.

Candidates may change their course selection during the two-week add/drop period which is scheduled at the beginning of each semester. Requests for changes beyond the 2-week deadline will not be permitted, except for medical or other reasons acceptable by the Faculty Board. Candidates' withdrawal from any course without permission will be given a failed grade. In course registration,

candidates should pay special attention to the pre-requisite and co-requisite requirements of courses as specified in the syllabuses. A prerequisite is a course which candidates must have completed in accordance with the conditions stipulated by the Head of Department before being permitted to take a course in question. A co-requisite is a course which candidates must take at the same time as the course in question.

4. Coursework and examination ratio

Each 6-credit course leads to one written examination paper which will be two hours in length, or three hours in the case of a 12-credit course, unless otherwise specified. The final grading of each course will be determined by performance in the examination and an assessment of coursework in the ratio of 60:40, unless otherwise specified.

The examinations and assessments of courses carrying weightings other than 6 and 12 credits are detailed in the syllabuses.

For candidates admitted in or after the academic year 2004-2005

5. Criminal Justice (Second Major)

I. Objectives

Crime and its control are among some of the oldest problems facing society. In comparison, criminal justice programme is a relatively recent development, though it is now a commonly accepted part of the university curriculum elsewhere. Criminal justice studies combines a concern for current problems and practices associated with crime control with an understanding of law and social sciences as they are related to criminal justice issues. Candidates will study topics such as criminology, the sociology of law, corrections, social policy, and social administration. The programme seeks to promote an understanding of not only 'how' the criminal justice system operates, but 'why' it should or should not continue to operate in the way it does, and is aimed for students who wish to assume a professional position in the criminal justice system and any one else having a general interest in crime and its control.

7. Global Studies (Second Major/Minor)

I. Objectives

The saying, "Think global, act local" has become part of our everyday vocabulary. Whether one is drinking a Coca-Cola, standing at an airport security check-point installed after "9/11", or simply contemplating global warming, it is impossible to ignore the impact of our unprecedented levels of global interdependence. How are we to comprehend the ways in which globalization affects our political, economic, social and personal lives? This multi-disciplinary programme of study is designed to help students better understand the multi-dimensional interconnectedness between individuals, societies, and countries that characterizes today's world. It represents a collaboration of core departments in the faculty and is intended to provide students with the foundation for examining the impact of globalization on the world around us from a variety of theoretical perspectives. As this programme of study pays particular attention to issues of Asia and social change in the global context, it is highly relevant for students considering careers in the public and private sectors that require a regional or international focus.

8. Media and Cultural Studies (Second Major/Minor)

I. Objectives:

The media are central to our experience and identities in today's modern world. We find ourselves increasingly saturated by messages and ideas from television, radio, print media, advertisement, cinema and the internet. The media not only shape our education, politics, art and entertainment, constituting our worldviews, identities and fantasies, they also help to connect and divide communities locally, nationally and globally. Their influences are further complicated by the rise of new information technology and the globalization of outlook and resources, posing us new demands and challenges. To what extent will those changes result in a multiplicity of lifestyles and identities? Are we getting more homogenized and westernized? Questions of this kind are under considerable discussion in the social sciences as it becomes clear that culture, life-styles as well as class, gender and ethnic identities are the grounds on which economic, social and political forces of the new era work themselves out. In this programme, the connections between individuals, their communities, and the world, mediated by culture and the media, are now being examined in relation to global versus local, modern versus tradition, diaspora versus nationalism, and culture versus market.

This multidisciplinary programme of study represents the collaboration of the core departments in the Faculty and other departments in the University and is intended to provide students with the foundation for examining the role of media and culture in today's society from a variety of perspectives. It is principally concerned with developing informed and critical understanding and responses to the media and culture and considering the relationships between the two. It enables students to engage with issues concerning the relationship between culture and identity, forms of representation, and the role of media in shaping the ways we live in class discussion and project presentation. It also equips students with useful tools and analytical skills to researching media and culture.

4. Family and Child Studies (Department of Social Work and Social Administration)

The programme aims to develop students' understanding of the development of children and young people from a psycho-social perspective. One emphasis is placed on how cultural factors, especially of the indigenous Chinese culture, influence their growth socially, cognitively and psychologically. With reference to these understandings, another focus of the programme is to teach students methods to work with children and young people with different problems and backgrounds. It is expected that after taking the programme, students will be equipped to work with children and young people in different settings more effectively.

5. Human Resources Management (Department of Psychology)

Since the early 1980s, Hong Kong has witnessed a shift from manufacturing to a service industry in its economic structure. There is also a rapid pace of automatization and computerization in all sectors of our economy. These two major changes have resulted in the pressing needs for retraining, revised job design, better organization communication, better management of human resources, and engineering psychology. A recent survey reveals that there are 12 jobs available to every university student trained in the area of human resources management. This figure speaks to the huge demand for human resources professionals. This minor programme is designed to serve the above needs of the society.

6. International Business (School of Economics and Finance)

For business, the future is global. For business executives, a solid understanding of international business is of utmost importance in this increasingly global business environment. The complexity of a business transaction between two countries, for example, between Hong Kong and China, or between China and the United States, arises from the differences in accounting, banking, culture, currency, finance, governmental regulations, information systems, insurance, law, management, marketing, political systems, taxation, and transportation. It is impossible for one to understand contemporary events and market trends without a sound background in international business. It is essential, therefore, that our students possess an understanding of the operation of global financial systems and business.

The field of International Business is designed to meet the needs of students who look forward to specialized careers in corporate finance, financial counseling, investment management, or banking. Topics relevant to local and China economy are incorporated throughout all the courses.

As a field of study, International Business is broader in focus than international trade. It draws upon contributions from the traditional business disciplines of finance, banking, management, management information systems, and marketing. It also draws from anthropology, culture, economics, geography, history, languages, law, politics, psychology, and sociology. Although it is offered as a standalone concentration, it is highly recommended as a secondary concentration to any other students outside the Faculty of Social Sciences.

ECON0301.	Theory of international trade (6 credits)
ECON0302.	International finance (6 credits)
FINA0103.	International banking (6 credits)

2. Chinese

The mission of the Department of Chinese is to promote the understanding of Chinese language, literature and history; to further the ability of the students in the use of the Chinese language; and to advance the study of the development of the Chinese culture and its place in the modern world.

The degree courses in the Department of Chinese are normally taught in Chinese. Course design is based on the assumption that the students have attained facility in the use of the Chinese language before entering the University, and that they have also acquired sufficient mastery of the English language to enable them to use freely references and relevant works published in English. Provision may be made from time to time for elective courses on various aspects of the Chinese civilization.

The Department offers four majors and four minors in the second and third years. The four majors are as follows:

- (i) **Chinese Language and Literature:** Group A.
- (ii) **Chinese History:** Group B.
- (iii) **Translation:** Group C (please refer to Group C for other requirements).
- (iv) **Chinese Studies:** Groups A and B.

Students are required to take not less than a total of 48 credits of second and third year courses in the specified group(s), and to meet other specified requirements, if any. For the Chinese History major, students may take one or more of the following: HIST2003, HIST2004 and HIST2018 to fulfil the

credit requirements. Students who intend to major in Chinese Language and Literature or in Translation are required to take the following first year courses as prerequisites unless the Head of Department approves otherwise:

- (i) **Chinese Language and Literature majors:** CHIN1101. A survey of the Chinese language and a total of not less than 6 credits of other first year courses in Group A.
- (ii) **Translation majors:** CHIN1311. Introduction to translation and CHIN1312. Language studies for translation I.

There are no first-year prerequisites for the majors in Chinese History and Chinese Studies.

Not all the courses listed below will be offered every year. Students should refer to the departmental undergraduate handbook, published yearly and usually in the summer, for the courses on offer in the next academic year.

All Chinese courses available to BSocSc students are listed as below:

ASSESSMENT

Coursework assessment will be based on performance in tutorials and seminars, and on the strength of essays and such other exercises as can be assessed continually.

Each course will be examined by a written paper of not more than 2-hour duration except those courses which are assessed by 100% coursework.

3. Comparative Literature

If we do not study other cultures, we cannot even understand our own. In the Department, we study literature from a broad range of international and interdisciplinary perspectives, and in relation to other forms of cultural expression.

The department offers courses in literary, theoretical and cultural studies using cross-cultural materials and interdisciplinary approaches. Some of the main areas covered include Visual Cultures and Film Studies, Literature and Theory, Feminism and Gender Studies, Postcolonial/Hong Kong/China Studies, and New Media and Global Studies.

Our courses study a wide range of texts in terms of both form and content. Students learn to read culture in the broadest sense – analyzing literary texts, films, fashion magazines, cyber texts, advertisements, comics, popular music, and other relevant cultural productions and practices.

Such an approach provides a focus for significant interdisciplinary study in the Humanities and a training in thinking about the nature of the relationship between culture and society. The direction of interest is indicated in the description of each course.

Texts are studied in English, though texts in Chinese are used in Cross-Cultural studies and Hong Kong/Chinese cultural studies.

Courses are open to students who have fulfilled the University's entrance requirements, though priority will usually be given to students with a Grade C or above in the Use of English examination, or who otherwise show special aptitude.

In order to major in Comparative Literature first year students must normally take at least two of the 6-credit first year courses offered by the Department. In the second and third years, students must select not less than eight 6-credit courses or equivalent from among those offered by the Department. There are no particular requirements in terms of core courses and course combinations.

All courses offered in the Department will be examined by 100% continuous assessment. Course organisers will provide details of assessment at the beginning of their course. **All specific course descriptions will be provided in the departmental handbook and can be downloaded from our website: www.hku.hk/complit/courses.htm.**

4. Fine Arts

The Department of Fine Arts teaches the history and theory of art. European, American, Chinese and Japanese artistic traditions are all examined in depth, and the broader international context of art making is also considered. An introduction to museum studies is also offered. Students may major in Fine Arts, or take a disciplinary minor, but will also discover many fruitful combinations between Fine Arts courses and those of other Arts and Social Science disciplines.

Students wishing to major in Fine Arts must normally pass **FINE1001** or **FINE1004** or **FINE1006** or **FINE1008** in their first year and must choose not less than 48 credits from among those courses offered by the Department in the second and third years. Of these 48 credits, at least 6 credits must be in Western art and at least 6 credits must be in Asian art. As part of the 48 credits total, every major must also take at least one of the following third year seminar courses: **FINE3006**, **FINE3008** or **FINE3009**. With the permission of the Head of Department, FINE3007 may also be counted as meeting this requirement.

There are no other specific requirements as to core courses or course combinations for majors, but prospective students are asked to note that individual second and third year courses in the Fine Arts Department may require **FINE1001** or **FINE1004** or **FINE1006** or **FINE1008** as a prerequisite. Other prerequisites for second- and third-year courses are listed in the course descriptions. In exceptional cases, these requirements may be waived. All major and other course selections are subject to the approval of the Head of Department.

The form of assessment (i.e. percentage weighting of coursework and/or examination) for each course is specified in the course descriptions. Coursework assessment will be based on the student's performance in tutorials, seminars, written work and other practical work as specified by the course instructor.

All Fine Arts courses available to BSocSc Students are listed as below:

 - (ii) *Japanese language-intensive* courses in various disciplines taught in the Department of Japanese Studies;
 - (iii) Japan-related *interdisciplinary content* courses in various disciplines which are open to any student who satisfies the prerequisites.

2. A major in Japanese Studies consists of 54 credits in the **Japanese Studies programme** to be taken in the Second and Third years.

Students undertaking the major must have taken the first year courses **JAPN1088 Japanese language I (Part 1) (9 credits)**, **JAPN1099 Japanese language I (Part 2) (9 credits)** and **JAPN1011 Introduction to Japanese studies (6 credits)**.

To major in Japanese Studies, students must take **JAPN2088 Japanese language II (Part 1) (6 credits)** and **JAPN2099 Japanese language II (Part 2) (6 credits)**, and **JAPN3088 Japanese language III (Part 1) (6 credits)** and **JAPN3099 Japanese language III (Part 2) (6 credits)** (as in List A below) in their second and third years respectively. In addition, they must complete at least one *Japanese Language-Intensive* Course (6 credits) (to be selected from list B) in each of the second and third years, and must also complete three *Interdisciplinary Content* Courses (6 credits each) (to be selected from List C) during the two-year period that comprises their second and third years (completing at least one in each of their second and third years).

There is no departmental prerequisite for admission to **JAPN1088 Japanese language I (Part 1)** and **JAPN1099 Japanese language I (Part 2)**. The language courses offered by the Department are designed for students who have no prior knowledge of Japanese, and who progress normally from one level to the next. Therefore, students may not *normally* enrol for **JAPN2088 Japanese language II (Part 1)** and **JAPN2099 Japanese language II (Part 2)** or **JAPN3088 Japanese language III (Part 1)** and **JAPN3099 Japanese language III (Part 2)** without having satisfactorily completed the previous level. However, students with prior qualifications in the Japanese language who wish to apply for a waiver should sit for a qualifying examination. Second and third year students should contact the Departmental general office for the qualification examination date and time before 31 July 2006 [Same conditions also apply to **JAPN1066 Japanese language I(a) (Part 1)** and **JAPN1077 Japanese language I(a) (Part 2)**, **JAPN2066 Japanese language II(a) (Part 1)** and **JAPN2077 Japanese language II(a) (Part 2)**, and **JAPN3066 Japanese language III(a) (Part 1)** and **JAPN3077 Japanese language III(a) (Part 2)**]. A C- grade in the **JAPN1099 Japanese language I (Part 2)** is the minimum requirement for enrolment in **JAPN2088 Japanese language II (Part 1)**. Students who obtain D+ or lower in the **JAPN1099 Japanese language I (Part 2)** will be required to take a further examination and/or interview and must obtain a pass mark (50%) in order to be admitted to **JAPN2088 Japanese language II (Part 1)**.

8. Language Centre

Major in French

Students enrolled in French courses in their first year may choose to major in French in their second and third years. The objective of the programme is to bring participants to a high level of proficiency in the language as well as to provide them with a sound knowledge of French society and culture.

In order to declare a major in French, applicants must initially complete two foundation courses in their first year (LANG1001 *French I.1* and LANG1002 *French I.2*, first and second semesters, 18 credits in all) and achieve grade C- minimum in these courses. In addition, applicants will normally be required to take part in an intensive course offered by the Centre at the end of the second semester (usually in June).

In their second and third years of study, students pursuing a major in French must take a total of 48 credits of French courses which should normally be distributed as follows: in the Second Year, 24 credits from courses at Level 200, of which 12 credits must be from the core language course, i.e., *French language II.1*; in the Third Year, 24 credits from courses at Level 300, of which 12 credits must be from the core language course, i.e., *French language III.1*. (See list of French courses). In addition, students will normally be required to take part in an intensive course offered by the Centre at the end of the fourth semester (usually in June). Alternatively, students will be strongly encouraged to participate in a linguistic stay in France during the summer.

Major in German

The Major in German provides students with a comprehensive knowledge of both spoken and written German. In addition to the acquisition of these linguistic skills students will be introduced to a wide range of aspects of contemporary German society and culture through the study of numerous multimedia materials and documents in the target language that will be included in courses in area studies, translation and literature in the Second and Third Year.

All German Major Students are encouraged to attend an intensive summer language course (German in Germany) of 4 weeks duration at a university in Germany during the summer between their 2nd and 3rd year and successful completion of such a course at the appropriate level will count as 3 credits towards their major requirements. Longer stays of one to two semesters are also encouraged and can be arranged through the German Section.

Programme Requirements

First Year

In the First Year students will have to successfully complete a total of 18 credits in German language by enrolling in the courses LANG1003 German I.1 (6 credits/1st Semester) and LANG1004 German I.2 (12 credits/2nd Semester).

Second Year

In the Second Year students will have to complete a total of 24 credits of courses taught in German:

- a) LANG2004. German II.1 (12 credits/whole year)
- b) a total of 12 credits from the following courses:
 - LANG2039. Translation exercise I (3 credits/1st semester)
 - LANG2041. Representations of contemporary German society in the media (3 credits/1st semester)
 - LANG2040. Translation exercise II (3 credits/2nd semester)
 - LANG2042. Producing German texts I (3 credits/2nd semester)
 - LANG2056. Understanding Germany and the Germans (3 credits/2nd semester).

During the summer between Second and Third Years students are strongly encouraged to attend one of the summer language courses offered by universities in Germany. Successful completion of such a four weeks' course at late beginners/early intermediate level (based on the terminology used in Germany) can be counted as 3 credits towards the requirements for the German Major.

Third Year

In the final year students will have to complete a total of 24 credits from the following courses taught in German:

- a) LANG3007. German III.1 (12 credits/whole year)
- b) 3 credits from
 - either LANG3048. Fairytale princes, nature lovers and revolutionaries – The German Romantics (3 credits/2nd semester)
 - or LANG3010. German projects (3 credits/2nd semester)
- c) a total of 9 credits from the following courses:
 - LANG3008. Reading course (3 credits/1st semester)
 - LANG3039. German in Germany (3 credits/taught during the summer between Year II & III)
 - LANG3045. Translation exercise III (3 credits/1st semester)
 - LANG3046. Translation exercise IV (3 credits/2nd semester).
 - LANG3047. Producing German texts II (3 credits/1st semester)

Major in Spanish

Students enrolled in Spanish courses in their first year may choose to major in Spanish in their second and third years. The objective of the programme is to bring participants to a high level of proficiency in the language as well as to provide them with a sound knowledge of Spanish society and culture.

In order to declare a major in Spanish, applicants must initially complete two foundation courses in their first year (LANG1038 Spanish language I.1 and LANG1039 Spanish language I.2, first and second semesters, 18 credits in all). In addition, applicants will normally be required to take part in an intensive course offered at the end of the second semester (usually in June).

In their second and third years of study, students pursuing a major in Spanish must take a total of 48 credits of Spanish courses which should normally be distributed as follows: in the Second Year, 24 credits from courses at level 200, of which 12 must be from the core language course, i.e. Spanish II; in the Third Year, 24 credits from courses at level 300, of which 12 must be from the core language course, i.e. Spanish III (see the list of courses below). In addition, students will normally be required to take part in an intensive course offered at the end of the fourth semester (usually in June). Alternatively, students will be strongly encouraged to participate in a linguistic stay in Spain (or a Hispanic country) during the summer.

9. Linguistics

In the Department of Linguistics, students can investigate a variety of different languages and through such investigations, come to a better understanding of the shared structure and broad variation of the world's languages.

The undergraduate programme in Linguistics permits students to combine in a single field a variety of Arts and Social Science subjects and to develop their analytic skills in depth. Students are encouraged to explore with members of staff the many relationships of linguistics with other fields in order to discover the programme that best suits their individual goals and interests.

The Department offers the following majors and joint programmes:

- Major in Linguistics
- Major in Human Language Technology
- Programme in Linguistics and Philosophy

I. Major in Linguistics

Students majoring in Linguistics must take LING1001 Introduction to linguistics, and LING1003 Language, thought, and culture in their first year.

They must also take

- LING2004. Phonetics: describing sounds and

II. Major in Human Language Technology (HLT)

Human Language Technology is a relatively new discipline that investigates two main issues. On the one hand it explores the theoretical and practical issues surrounding the ability to get technology, especially modern information communications technology (ICT), to interact with humans using natural language capabilities. On the other hand, it is a discipline that investigates how technologies, especially ICTs, can serve as useful adjuncts to humans in language understanding, including analysis, processing, storage and retrieval. This investigation could lead to practical applications, including the design of online learning environments for language learning and multilingual retrieval for automatic translation.

The following are some of the objectives of the proposed programme: (1) to give students a perspective of how technology relates to human language processing; (2) to understand how information communications technology has been applied to different aspects of Linguistics and human language processing and to what effect; (3) to critically evaluate the role of technology in human language processing; and (4) to examine the range of opportunities available to different professionals regarding the application of technology in human language processing.

Students majoring in HLT must take LING1001. Introduction to linguistics, and preferably also LING1002. Language.com:Language in the contemporary world or LING1003 Language, thought, and culture in their first year. They must also take LING2004. Phonetics: describing sounds and LING2050. Grammatical description normally in their second year and LING3003. Linguistics field trip in their third year. In addition, they must take a minimum of 30 credits in their second and third year of study from the following list of courses:

Second Year:

LING2011. Language and literacy in the information age (6 credits)

LING2004. Phonetics: describing sounds (6 credits) and/or

LING2012. Experimental phonetics (6 credits)

LING2027. Phonology: An introduction to the study of sound systems (6 credits) and/or

LING2031. Phonological theory (6 credits)

LING2030. Morphological theory (6 credits) and/or

LING2050. Grammatical description (6 credits)

LING2032. Syntactic theory (6 credits) and/or

LING2050. Grammatical description (6 credits)

LING2003. Semantics: meaning and grammar (6 credits)

Third Year:

LING2001. Computational linguistics (6 credits)

LING2018. Lexical-functional grammar (6 credits)

LING2024. Lexicology and lexicography (6 credits)

LING2041. Language and information technology (6 credits)

LING3003. Linguistics field trip (6 credits)

Students may seek permission to replace an HLT course with another relevant course in the department should there be staffing or timetabling problems. Students in the third year can take second year courses, if necessary.

III. Linguistics and Philosophy

A second major shall consist of 48 credits second and third year courses in Linguistics and Philosophy Syllabus. As a prerequisite, candidates must pass LING1001 Introduction to linguistics and one Philosophy first year course as specified below.

10. Music

The Department of Music offers courses designed to meet the needs of students working towards a degree either as a music major or specialist, or as a major in another area. Our courses have been designed with the following aims in mind:

- To deepen students' understanding of the functions, concepts, structures and values of music and its role in society.
- To broaden students' knowledge of the diverse musical cultures of the world and their histories, styles and ideas.
- To train students to think critically about music and to equip them with the verbal skills which will enable them to articulate their thinking.
- To promote creative activity in the composition and performance of music as a mode of discourse that uniquely complements other modes of discourse in the humanities.
- To provide a comprehensive education that integrates the activities of scholarship, composition, and performance, connecting them to the larger world of learning in the humanities, the sciences and commerce.

The courses cover a wide range of topics and approaches, including the role of the world's music in society, the study of historical and contemporary perspectives, the application of technology in music, and composition and performance. Cross-cultural and cross-disciplinary interests are particularly encouraged. Some courses do not require previous training in music, and students may be admitted to any course with the approval of the Head of Department.

First year music specialists and intending majors must take:

11. Philosophy

Candidates wishing to have a second major in Philosophy should normally have taken at least one first level course, except where otherwise indicated. Apart from PHIL3810. Senior seminar and PHIL3910. Senior thesis, they are all second or third year courses.

Most of these courses consist of 18 lectures in one semester, together with tutorials. The final grade of courses offered by the Department will be determined by coursework assessment only. Details of tutorial and other arrangements are published each year in the department's booklet, Choices in Philosophy.

All these courses but two are listed under four groups:

Knowledge and reality
Mind and language
Moral and political philosophy
History of philosophy

Of the second and third level courses listed, twelve to sixteen will normally be offered each year. This means that not every course will be available in any two-year period. Some courses, however, are likely to be offered every year, and some we prefer to give at least once every two years to make sure that every student has an opportunity to take them.

Students who major in philosophy must take at least eight courses in philosophy, and are recommended to take at least one course from each of these categories. Third year majors are recommended to take the Senior seminar in their final year, especially if they are considering further study in philosophy, provided that their second year grades reach a good level.

12. Philosophy

A minor shall consist of 24 credits of second and third-year courses in Philosophy. No pre-requisites are required in the First Year. Courses taken to fulfill the requirement of candidates' major may not be counted towards a minor in Philosophy. Candidates please refer to Philosophy Major for the course list.

Interdisciplinary Minors

Candidates in the second year of the studies may select courses from the lists specified in the syllabuses but shall not be permitted to take more than 12 credits from one department/programme to satisfy the requirements of one minor. The same course shall not be taken to fulfil the requirements for a major and a minor, or for two minors.

Courses may have prerequisites; please refer to the syllabus of the relevant department/programme for the prerequisite(s).

1. Contemporary China and Hong Kong

This minor gives students with a general interest in China and Hong Kong a better understanding of physical, cultural and human environments of the two societies within the larger global and regional settings. The courses offered examine a range of contemporary development issues and future challenges faced by China and Hong Kong in an increasingly globalized world.

3. Globalism: Cultures, Spaces, Languages

The term 'Globalism' suggests an organized phenomenon that could be studied through a coherent set of theoretical frameworks. The courses in this 'Minor' explore and challenge this understanding of 'Globalism'. They show how a global dynamic runs with varying intensities in visual and literary representations, in different times and places, and how the impact on each other of the 'global' and the 'local' can have very diverse effects on and meanings for different cultures and societies.

MINORS OFFERED BY THE FACULTY OF ENGINEERING

Department of Computer Science

The Department of Computer Science has a long tradition of offering IT courses to students of other departments. To declare a “Minor in Computer Science”, students are required to pass 2 core courses and at least 4 elective courses in computer science. All these courses are of 6 credit-units. They will be taught in a single semester with 3 hours of lectures per week. Assessment of each course will be based on a three-hour written examination and in-course assessment in a ratio as indicated below.

Students are also welcome to take any of the following list of courses as broadening courses.

Core Courses (Junior level):

CSIS1117.	Computer programming I (6 credits)
CSIS1119.	Introduction to data structures and algorithms (6 credits) [for intake of 2005 or before]
CSIS1122.	Computer programming II [for intake of 2006 and after]

Elective Courses (Senior level):

CSIS1119.	Introduction to data structures and algorithms [for intake of 2006 and after]
CSIS0250.	Design and analysis of algorithms (6 credits)
CSIS0270.	Artificial intelligence (6 credits)
CSIS0271.	Computer graphics (6 credits)
CSIS0278.	Introduction to database management systems (6 credits)
CSIS0293.	Introduction to theory of computation
CSIS0297.	Introduction to software engineering (6 credits)
CSIS0311.	Legal aspects of computing (6 credits)
CSIS0315.	Multimedia computing and applications (6 credits)
CSIS0317.	Computer vision (6 credits)
CSIS0320.	Electronic commerce technology (6 credits)
CSIS0322.	Internet and the World Wide Web (6 credits)
CSIS0396.	Object-oriented programming and Java (6 credits)
CSIS0521.	Concepts and tools for software development (6 credits)

MINOR OFFERED BY THE FACULTY OF LAW

Legal Studies

This Minor aims to provide social sciences students an opportunity to have some exposure to legal issues in an area which may interest them and/or are related to their undergraduate degree.

Candidates who wish to minor in Legal Studies are required to have obtained a minimum of grade B in Use of English in HKALE or equivalent and must successfully complete 36 credits in the Years II and III of studies from the following lists:

a) Compulsory courses (18 credits) – Year II

LLAW1001. and LLAW1002. Law of contract I and Law of contract II (12 credits)

And either

LLAW1005. Law of tort I (6 credits)

Or

LLAW1008. The legal system (6 credits)

b) Optional courses (18 credits) – Year III

LLAW1005. and LLAW1006. Law of tort I *(6 credits) / Law of tort II (6 credits)

LLAW1008. The legal system * (6 credits)

LLAW1009. Law and society (6 credits)

LLAW2001. Constitutional law (6 credits)

LLAW2003. and LLAW2004. Criminal law I & II (12 credits)

LLAW2009. Introduction to Chinese law (6 credits)

LLAW3001. Introduction to legal theory (6 credits)

LLAW3007. Alternative dispute resolution (6 credits)

LLAW3010. Law of business associations (6 credits)

LLAW3034. Labour law (6 credits)

LLAW3040. Medico-Legal issues (6 credits)

LLAW3043. Principles of family law (6 credits)

LLAW3044. Public international law (6 credits)

LLAW3046. Child and the law (6 credits)

LLAW3062. Human rights in China (6 credits)

LLAW3080. Governance and law (6 credits)

LLAW3069. Regulation of financial markets (6 credits)

LLAW3093. Administrative law (6 credits)

* Unless already taken as a compulsory requirement

All the courses listed above are regarded as senior level courses.

The recommended normal study plan is that the students would have to satisfy the compulsory requirement (18 credits) in the second year of their studies, and then select 3 courses (18 credits) from the optional courses to take in their final year. It is not recommended that students take law courses in their first year.

Since there is the possibility of timetable clashes, students who are unable to take all 18 credits of the compulsory requirement in the second year of studies should at least take 12 credits in that year. Students may take a maximum of 24 credits of law courses in the second year of studies. Students moving from the second year to the third year may not proceed to the optional courses unless they pass at least 12 credits of the compulsory requirement in the second year of studies (with supplementary exams if necessary).

MAJORS AND MINORS OFFERED BY THE FACULTY OF SCIENCE

The Faculty of Science offers the following majors and minors to students in the Faculty of Social Sciences starting from the academic year 2004-05:

Majors: *Biochemistry, Biology, Biotechnology, Chemistry, Earth Sciences, Ecology and Biodiversity, Environmental Protection, Food and Nutritional Science, Material Science, Mathematics, Physics, Risk Management and Statistics*

Minors: *Actuarial Studies, Astronomy, Biochemistry, Biology, Biotechnology, Chemistry, Earth Sciences, Ecology & Biodiversity, Environmental Protection, Food and Nutritional Science, General Science, Mathematics, Physics, Risk Management and Statistics*

Majors

1. Major in Biochemistry

Biochemistry, strengthened with molecular biology, is a field with enormous applications to our daily lives. It also is a discipline of sublime fascination. Our understanding of the biochemical bases of various life processes has greatly improved human welfare, particularly the medical and nutritional aspects. Further advances in this rapidly expanding field of knowledge, including building and establishing new conceptual frameworks, development of novel methodologies and techniques, should pave way to even more spectacular insights into nature and lead to a better control of our destiny.

The Major in Biochemistry offered by the Department of Biochemistry is designed to provide students with both basic and advanced knowledge in modern biochemistry and molecular biology. Our goal is to develop and equip students with enough critical thinking and analytical skills so that they can embark on a career in biochemical sciences.

Minimum Entry Requirement : AL Chemistry or equivalent

Minimum Credit Requirement : 72 credits (24 credits introductory level & 48 credits advanced level courses)

Impermissible Combination : Minor in Biochemistry

Required courses (72 credits)

1. Introductory level courses (24 credits)	
BIOC1001. Basic Biochemistry	6
BIOC1003. Introduction to Molecular Genetics	6
CHEM1206. General and Analytical Chemistry ¹ OR	
CHEM1301. Basic Inorganic Chemistry ²	6
Plus one of the following courses:	
CHEM1401. Fundamentals of Organic Chemistry ³	6
CHEM1406. Basic Organic Chemistry ³	6
2. Advanced level courses (48 credits)	
BIOC2601. Metabolism	6
BIOC2603. Principles of Molecular Genetics	6
BIOC2604. Essential Techniques in Biochemistry and Molecular Biology	6

BIOC3610.	Advanced Biochemistry I	6
BIOC3611.	Advanced Biochemistry II	6
BIOC3613.	Molecular Biology of the Gene	6
BIOC3615.	Advanced Techniques in Biochemistry & Molecular Biology	6
BIOL2301.	Protein Structure and Function	6

Note: ¹ For students admitted in 2006 or after.
² For students admitted in 2005 or before.
³ CHEM1401 and CHEM1406 are mutually exclusive.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

2. Major in Biology

Biology has developed into a broad and diverse field of study. This Major explores many aspects of the biological sciences, thereby providing a good general background in biology relevant for a wide range of job options. In their third year, students will be able to select from a range of interesting courses to suit their own interests.

Minimum Entry Requirement : AL Biology or equivalent

Minimum Credit Requirement : 72 credits (24 credits introductory level & 48 credits advanced level courses)

Impermissible Combination : Major in Biotechnology;
 Ecology & Biodiversity;
 Environmental Protection;
 Food & Nutritional Science

ECOL0040.	Ecology and Evolution	3
ECOL0041.	Evolutionary Diversity	6
ECOL0042.	Ecology Field Course	3

2. Advanced level courses (48 credits)

BIOL2303.	Introduction to Molecular Biology	6
ECOL2004.	Environmental Microbiology ¹ OR ECOL2022 Biodiversity ²	6

Plus at least one of the following courses:

BIOL2112.	Plant Physiology	6
BIOL2215.	Animal Physiology	6

Plus at least 30 credits of advanced level courses (BIOL2000, BIOL3000, ECOL2000 or ECOL3000 level) of which 12 credits at BIOL2000 or ECOL2000 level and 12 credits at BIOL3000 or ECOL3000 level, subject to prerequisite requirements.

Note: ¹ For students admitted in 2006 or after.

² For students admitted in 2005 or before.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

3. Major in Biotechnology

As the 21st Century opens, advances in biotechnology are accelerating at a remarkable pace. There are many exciting discoveries that have improved modern society, in terms of health, nature and economic development. This Major will first equip you with a solid background in molecular biology, microbiology, biochemistry and cell biology. Based on your interests, you will then further acquire knowledge in the specialized fields of medicine, diagnostics, agriculture, aquaculture, etc, from the advanced courses. Employment opportunities in various sectors of industry and Government, including R&D, manufacturing, sales, and customer service, are available to our students.

² For students admitted in 2005 or after.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

4. Major in Chemistry

The dictionary defines chemistry as “the scientific study of the structure of substances, how they react when combined or in contact with one another, and how they behave under different conditions”. How chemists actually do this to investigate the properties and reactions of matter vary widely and are constantly undergoing change as new methods are discovered, new equipment is invented, and new techniques are developed. Chemistry is a central science, which interacts with many other disciplines. The aim of this Major is to provide students with a solid training in the basic areas of chemistry such as physical, inorganic, organic, applied and analytical chemistry. Through a variety of training, the Major can equip students with skills and experience in both theoretical and experimental investigations that are very important for their future career goals in the hi-tech and knowledge-based economy.

Plus at least 9 credits of advanced level Chemistry courses (CHEM2000 or CHEM3000 level) of which 6 credits must be at CHEM3000 level, subject to prerequisite requirements.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

5. Major in Earth Sciences

In Earth Sciences, we study the nature and evolution of our planet. Geoscientists use their knowledge to increase our understanding of Earth processes and resources to improve the quality of human life. The Earth Science Major offers students an opportunity to learn about local and regional geological and environmental problems. The primary objective is to give students a robust training in the basics of Earth sciences as well as technical skills in certain specialized areas. Both theoretical and applied subjects such as mineralogy (the study of minerals), petrology (the study of rocks), geophysics, geochemistry, surficial processes, sedimentology, earth history, structural geology, fieldwork, regional geology, earth resources, environmental geology, hydrogeology and engineering geology are offered.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

6. Major in Ecology & Biodiversity

Understanding biological diversity, the relationships between animals and their environments, and how humans interact with both is critical for conserving the social and economic benefits yielded by the natural world, without irreversibly destroying or degrading it. This Major introduces biodiversity at all levels, genes, species and ecosystems, provides a strong academic background for studying and researching in these topics. It also fosters an appreciation for the richness of local and regional

biodiversity. There are many opportunities, both within Hong Kong and internationally, for graduates in this field.

7. Major in Environmental Protection

Humans are responsible for modification and degradation of nature yet it is only by human actions that we can protect habitats, ecosystems and the organisms that they contain for future generations. This Major helps students understand the causes of environmental degradation, and the ways in which they can be reduced or mitigated, including topics such as environmental impact assessment, ecotoxicology and bioremediation. Conservation biology and fisheries are also important components of this Major, which aims to provide the intellectual and practical skills needed for professionals working in environmental protection and related jobs.

8. Major in Food & Nutritional Science

This is a challenging area of interdisciplinary study. The science of food and nutrition aims at improving the quality of life through the understanding of interactions among food, environment and the human body. This Major will appeal to those who have a genuine interest in the food system and/or nutrition. Beginning with a handful of core courses, you will be able to mix and match advanced courses that suit your personal interest, be it food product development and analysis, metabolism and body function or nutrient-gene interaction. In the era where food safety, and diet and health take up news headlines this Major has been extremely popular.

9. Major in Materials Science

In the past few decades, we have witnessed a rapid development in technology that has had a major impact on the way we live. For example, synthetic fabrics have revolutionized the clothing industry, and the on-board computers that helped guide the Apollo 11 mission to the moon were less powerful than the personal computers that sit on the desks in every office and in many homes today. All these changes were due to the fact that new materials were developed, which was the collective effort of scientists from many different areas. Materials science is an interdisciplinary subject that involves studies of the chemical and physical properties of materials. In this Major, students will be required to take basic courses in chemistry and physics. The chemistry of materials synthesis (e.g. organic and inorganic materials) and their physical properties (mechanical, electrical, and optical properties) will be introduced. In the second and third years, advanced courses will focus on polymeric materials, nanomaterials, semiconducting materials, and their characterization techniques. In addition, students are required to take advanced physics and chemistry courses as electives. The Major is designed for students who are interested in materials sciences and technology for postgraduate studies.

10. Major in Mathematics

Mathematics has been referred to as "our invisible culture". Most people agree mathematics finds applications ranging from traditional ones in the physical sciences and engineering to more recent ones in the life sciences, economics, finance and management. Yet, many are dazzled by achievements mathematics helps to bring about that they forget about mathematics itself! A Major in Mathematics provides a solid comprehensive undergraduate education in the subject and will nurture quantitative reasoning, logical and analytical thinking, meticulous care to work, ability to conceptualize, problem-solving skill and innovative imagination.

11. Major in Physics

The Major in Physics is intended for students who would like to acquire a well-rounded foundation on the subject. It covers a wide range of basic courses in theoretical and experimental physics to prepare students for future careers which require a professional knowledge in physics, such as the semiconductor industry, education, and research. A large selection of elective courses is provided for students to pursue a wide range of topics from the small scale of nanomaterials to the large scale of astrophysics.

12. Major in Risk Management

The Major in Risk Management enables students to gain an intellectual understanding of both financial and investment risks. Exposure to various statistical techniques for risk modelling is provided, with specific applications to financial and insurance problems. Career opportunities are available in financial institutions and large corporations including banks and consulting firms.

13. Major in Statistics

For candidates in BSocSc (Statistics Stream) admitted in the academic year 2003-2004

Senior level courses in Statistics build upon junior level courses. Students in the Statistics Stream must choose to major in at least one of the two themes including Risk Management, and Statistics. Full details of the themes are listed below.

Risk Management Theme

STAT0100.	Statistical methods
STAT0102.	Linear statistical analysis
STAT3301/STAT3101.	Time-series analysis
STAT2303/STAT0103.	Probability modelling
STAT2315/STAT0113.	Practical mathematics for investment and pensions
STAT2309/STAT0109.	The statistics of investment risk
STAT3308/STAT3110.	Financial engineering
STAT2310/STAT0117.	Risk management and insurance

Statistics Theme

(i) 3 compulsory courses:

STAT0100.	Statistical methods
STAT0102.	Linear statistical analysis
STAT3301/STAT3101.	Time-series analysis

(ii) At least 5 senior level courses selected from Lists A and B, among which at least 2 must be from List B:

List A

STAT1304/STAT0104.	The analysis of sample surveys
STAT2305/STAT0105.	Quality control and management
STAT2306/STAT0106.	Business logistics
STAT2307/STAT0107.	Statistics in clinical medicine and bio-medical research
STAT2315/STAT0113.	Practical mathematics for investment and pensions
STAT2312/STAT0114.	Data mining
STAT2309/STAT0109.	The statistics of investment risk
STAT3810/STAT0802.	Risk theory

STAT2805/STAT0805.	Credibility theory and loss distributions
STAT2801.	Life contingencies
STAT2304.	Design & analysis of experiments
or STAT3104.	Planning of experiments
STAT2310/STAT0117.	Risk management and insurance

List B

STAT2303/STAT0103.	Probability modelling
STAT3304/STAT0111.	Computer-oriented statistical modelling
STAT3812/STAT0115.	Stochastic calculus with financial applications
STAT3811/STAT0803.	Survival analysis
STAT3302/STAT3102.	Multivariate data analysis
STAT3306/STAT3106.	Selected topics in statistics
STAT3307/STAT3108.	Project in statistics
STAT2313/STAT0116.	Marketing engineering
STAT3308/STAT3110.	Financial engineering

Students in the “Risk Management” theme or “Statistics” theme have the option to minor in “Actuarial Studies” by taking at least 4 of the following courses, in addition to those courses selected for the purpose of completing their major theme:

STAT3812/STAT0115.	Stochastic calculus with financial applications
STAT3810/STAT0802.	Risk theory
STAT3811/STAT0803.	Survival analysis
STAT2805/STAT0805.	Credibility theory and loss distributions
STAT2801.	Life Contingencies

or any other courses approved by the Department of Statistics and Actuarial Science

For candidates in BSocSc admitted in or after the academic year 2004-2005

The Major in Statistics equips students with powerful mathematical, analytic and computational skills, which are in great demand in many practical areas. It establishes for students a strong background in statistical concepts, and aims to provide a broad and solid training in applied statistical methodologies. Career opportunities are available in business, finance, industry, computing, marketing, communications, environmental protection, health organizations, as well as in scientific and academic research.

2. Minor in Astronomy

Have you ever enjoyed a beautiful starry night and wondered it came to be like that? The Minor in Astronomy is intended for students who would like to acquire some appreciation of the beauties of the universe. Students are offered the opportunity to receive training in both the theoretical and practical aspect of astronomy.

- Minimum Entry Requirement** : 1. AL / AS Physics or AL Engineering Science; and

² Students are strongly advised to take at least one of the following courses: PHYS1111, PHYS1112, and PHYS1314 to allow for maximum flexibility in selection for advanced level Physics courses.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

3. Minor in Biochemistry

Biochemistry, strengthened with molecular biology, is a field with enormous applications to our daily lives. It also is a discipline of sublime fascination. Our understanding of the biochemical bases of various life processes has greatly improved human welfare, particularly the medical and nutritional aspects. Further advances in this rapidly expanding field of knowledge, including building and establishing new conceptual frameworks, development of novel methodologies and techniques, should pave way to even more spectacular insights into nature and lead to a better control of our destiny.

The Minor in Biochemistry offered by the Department of Biochemistry is designed to provide students with both basic and advanced knowledge in modern biochemistry and molecular biology. Our goal is to

develop and equip students with enough critical thinking and analytical skills so that they can embark on a career in biochemical sciences.

4. Minor in Biology

What is biology and why is it important? This Minor provides students with a foundation in the biological sciences. Students are offered a broad range of options that should suit all interests, from genetics to microbiology, ecology to morphology and biodiversity to physiology. This is a good choice for a non-scientist who wants to know what biology is all about, as well as for non-biological scientists to explore the living side of science.

ECOL0042. Ecology Field Course	3

2. Advanced level courses (24 credits)

At least 12 credits of the following courses:

BIOL2112.	Plant Physiology	OR	BIOL2215 Animal Physiology	6
BIOL2115.	Cell Biology & Cell Technology			6
BIOL2303.	Introduction to Molecular Biology			6
ECOL2004.	Environmental Microbiology ¹	OR	ECOL2022 Biodiversity ²	6

Plus at least 12 credits of advanced level courses (BIOL2000, BIOL3000, ECOL2000 or ECOL3000 level) of which 6 credits at BIOL3000 or ECOL3000 level, subject to prerequisite requirements.

Note: ¹ For students admitted in 2006 or after.

² For students admitted in 2005 or before.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

5. Minor in Biotechnology

Technology leads our future. Biotechnology is relevant to many business sectors and our daily life. Students who are interested in the developments of biological sciences are highly recommended to take this Minor. You will learn the scientific principles underlying current biotechnological advances and will become literate in biotechnology business and advancements.

6. Minor in Chemistry

Why study Chemistry? Chemistry is both interesting and important. It is involved in almost everything you do. Chemistry occupies a central role in the natural sciences, it overlaps with other fields, and provides a fruitful source for important discoveries. For example, new discoveries in material sciences such as nanoscale materials cannot be realized without chemists. Astronomers now use results from chemical laboratories to search for new compounds in distant galaxies. Geologists analyse the structures of minerals and transformations between different forms of matter in the Earth's crust by using chemical principles of bonding and thermodynamics. Biologists try to understand the life process by chemical language in the field like molecular biology and chemical genetics. Therefore, the Chemistry Department offers this Minor for those students who need a knowledge of chemistry for their major subjects or those who have an interest in studying chemistry at a higher level. Students are required to take introductory courses in general and analytical chemistry and one other chemistry course from selected areas. The advanced courses emphasize instrumental analysis and spectroscopic techniques. In addition, students may also choose specialized courses in different areas of chemistry such as organic, synthetic, materials, medicinal, environmental, or industrial chemistry as their electives in the second and third years. The Minor is essential to students who major in science-related subjects such as the biological, medical, material and environmental sciences.

CHEM1401.	Fundamentals of Organic Chemistry ¹	6
CHEM1406.	Basic Organic Chemistry ¹	6
CHEM1506.	Basic Physical Chemistry	6

2. Advanced level courses (24 credits)

Any 24 credits of advanced level Chemistry courses (CHEM2000 or CHEM3000 level), subject to prerequisite requirements.

Note: ¹ CHEM1401 and CHEM1406 are mutually exclusive.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

7. Minor in Earth Sciences

To provide interested students an introduction to the different aspects of the discipline which may or may not be relevant to their major field of interest. Courses in physical geology and Earth history are offered in the first year followed by more advanced courses in the second and third year. A wide range of Earth Science courses are offered. A Minor in Earth Sciences is particularly suitable for students majoring in biochemistry, botany, chemistry, computing, ecology, economics, geography, mathematics, statistics, physics and zoology.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

8. Minor in Ecology & Biodiversity

Southeast Asia is extremely diverse in plants and animals, and Hong Kong has, for its size, a remarkable biodiversity. This Minor is an ideal introduction to the natural world, the species and ecosystems it comprises and the biological rules it follows. Students will first learn about general ecological principles and the local flora and fauna of the region. They will then be able to build upon this basic knowledge by selecting from among a wide range of courses that offer learning opportunities through practical and field work, traditional and virtual teaching, in more specialized areas of ecology and biodiversity.

9. Minor in Environmental Protection

Managing and conserving the environment is increasingly recognized as an important and necessary challenge for modern Society. Preserving biological diversity, whether species, genes, populations or ecosystems, requires an understanding of a range of exciting new areas in the life sciences. This Minor will provide students with an appreciation of the depth and breadth of this important developing field. The lectures are enhanced by valuable laboratory and practical experience that should be applicable to a wide range of careers, and contribute to a better understanding of the world we live in.

11. Minor in General Science

Science is an indispensable component of this modern world, with a significant impact to our daily lives. Be it the interaction between animals and their natural environment, the food in our daily diet, the synthesis of new materials (nanomaterials, polymeric and semiconducting materials), the mystery of the human gene, or the application of mathematics to solve problems. This Minor is suitable for non-Science students who are interested in exploring science and learning how scientists study the real world. The scientific knowledge, quantitative reasoning, logical and analytical thinking and sense of numeracy will be useful in various fields of finance, business, social sciences, arts and education. Students have the flexibility to gather courses in any area of interest.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

12. Minor in Mathematics

Mathematics has been referred to as "our invisible culture". Most people agree mathematics finds applications ranging from traditional ones in the physical sciences and engineering to more recent ones in the life sciences, economics, finance and management. Yet, many are dazzled by achievements mathematics helps to bring about that they forget about mathematics itself! A Minor in Mathematics provides an initiation into the subject and will nurture quantitative reasoning, logical and analytical thinking, meticulous care to work, ability to conceptualize, problem-solving skill and innovative imagination.

Note: ¹ Students selecting this option are strongly advised to take also MATH1101 and MATH1102.

Important! Ultimate responsibility rests with students to ensure that the required pre-requisites and co-requisite of selected courses are fulfilled. Students must take and pass all required courses in the selected major or/and minor in order to satisfy the degree graduation requirements.

13. Minor in Physics

The Minor in Physics is intended for students who would like to acquire a taste of the subject. The curriculum is designed with the flexibility for students with and without HKAL Physics/Pure Mathematics background. A large selection of elective courses is provided for students to pursue a wide range of topics from the small scale of nanomaterials to the large scale of astrophysics.

Minimum Entry Requirement : 1. AL / AS Physics or AL Engineering Science; and
2. HKCEE Additional Mathematics or AS Mathematics and Statistics or AL Pure Mathematics; or equivalent

SECOND MAJOR AND MINOR OFFERED BY THE INSTITUTE OF HUMAN PERFORMANCE

Second Major in Exercise Science

The Major in Exercise Science is a multi-disciplinary programme of education, synthesising the biophysical, psycho-social and health aspects of exercise. It is for students who are interested in the scientific study of human movement, with a particular focus on the recognition, evaluation, rehabilitation and prevention of acute and chronic illnesses related to inactivity.

Programme Structure

Candidates who wish to major in Exercise Science must successfully complete the following courses:

- A. Junior level compulsory courses (24 credits)
 - PBSL1111. Kinetic anatomy (6 credits)
 - PBSL1114. Physiology for human movement (6 credits)
 - PBSL1120. Foundations of exercise science (6 credits)
 - PBSL1121. Physical activity and health (6 credits)

- B. Senior level courses (at least 48 credits of courses from the list below)
 - PBSL2229. Exercise physiology (6 credits)
 - PBSL2233. Biomechanics (6 credits)
 - PBSL2234. Fundamentals of motor control and learning (6 credits)
 - PBSL2235. Measurement and promotion of physical activity (6 credits)
 - PBSL2236. Sport and exercise psychology (6 credits)
 - PBSL2200. Summer internship (0 credits)
 - PBSL3334. Advanced exercise physiology (6 credits)
 - PBSL3335. Advances in skill learning (6 credits)
 - PBSL3336. Exercise prescription and training (6 credits)
 - PBSL3337. Physical activity and disability (6 credits)
 - PBSL3338. Physical activity and diseases of inactivity (6 credits)
 - PBSL3339. Public health promotion of physical activity (6 credits)
 - PBSL3340. Special topic in exercise sciences (6 credits)
 - PBSL3998. Dissertation (12 credits)

Minor in Exercise Science

The Minor in Exercise Science provides an introduction to the discipline of exercise science and its application to health. It is for students who are curious about the scientific study of human movement and its various applications.

Candidates who wish to minor in Exercise Science must successfully complete the following courses:

- A. Junior level compulsory courses (12 credits)
 - PBSL1120 Foundations of exercise science (6 credits)
 - PBSL1121 Physical activity and health (6 credits)

- B. Senior level courses (at least 24 credits of courses from the list below)
 - PBSL2229 Exercise physiology (6 credits)
 - PBSL2233 Biomechanics (6 credits)
 - PBSL2234 Fundamentals of motor control and learning (6 credits)
 - PBSL2235 Measurement and promotion of physical activity (6 credits)
 - PBSL2236 Sport and exercise psychology (6 credits)
 - PBSL3334 Advanced exercise physiology (6 credits)
 - PBSL3335 Advances in skill learning (6 credits)
 - PBSL3336 Exercise prescription and training (6 credits)
 - PBSL3337 Physical activity and disability (6 credits)
 - PBSL3338 Physical activity and diseases of inactivity (6 credits)
 - PBSL3339 Public health promotion of physical activity (6 credits)
 - PBSL3340 Special topic in exercise sciences (6 credits)

Elective Courses

1. Centre of Buddhist Studies

No major or minor in Buddhist Studies will be offered to social sciences students but candidates may select the following courses as elective courses:

Senior Level

- BSTC0001. Making sense of Ch'an (Zen) (6 credits)
- BSTC0002. Life and Buddhism (6 credits)
- BSTC0003. Buddhism and contemporary moral problems (6 credits)
- BSTC0004. The art of living (6 credits)

2. English

No major or minor in English will be offered to social sciences students but candidates may select the following courses as elective courses:

Junior Level

- ENGL1009. Introduction to English studies (6 credits)

Senior Level

Semesters III to VI

- ENGL2002. Language in society (6 credits)
- ENGL2003. The history of English (6 credits)
