SCHOOL OF HUMANITIES

Comparative Literature

If we do not study other cultures, we cannot even understand our own. In the department, we study literature from a broad range of international and interdisciplinary perspectives, and in relation to other forms of cultural expression.

The department offers courses in literary, theoretical and cultural studies using cross-cultural materials and interdisciplinary approaches. Some of the main areas covered include Visual Cultures and Film Studies, Literature and Theory, Feminism and Gender Studies, Postcolonial/Hong Kong/China Studies, and New Media and Global Studies.

Our courses study a wide range of texts in terms of both form and content. Students learn to read culture in the broadest sense – analyzing literary texts, films, fashion magazines, cyber texts, advertisements, comics, popular music, and other relevant cultural productions and practices.

Such an approach provides a focus for significant interdisciplinary study in the Humanities and a training in thinking about the nature of the relationship between culture and society. The direction of interest is indicated in the description of each course.

Texts are studied in English, though texts in Chinese are used in Cross-Cultural studies and Hong Kong/Chinese cultural studies.

Courses are open to students who have fulfilled the University's entrance requirements, though priority will usually be given to students with a Grade C or above in the Use of English examination, or who otherwise show special aptitude.

A minor shall consist of 24 credit units of second and third-year courses from the Comparative Literature syllabus. No prerequisites are required in the First Year.

All courses offered in the department will be examined by 100% continuous assessment. Course organisers will provide details of assessment at the beginning of their course. **All specific course descriptions will be provided in the departmental handbook and can be downloaded from our website: www.hku.hk/complit/courses.htm.**

6. Minor in Chemistry (for students admitted in 2007 or thereafter)

Why study Chemistry? Chemistry is both interesting and important. It is involved in almost everything you do. Chemistry occupies a central role in the natural sciences, it overlaps with other fields, and provides a fruitful source for important discoveries. For example, new discoveries in material sciences such as nanoscale materials cannot be realized without chemists. Astronomers now use results from chemical laboratories to search for new compounds in distant galaxies. Geologists analyse the structures of minerals and transformations between different forms of matter in the Earth's crust by using chemical principles of bonding and thermodynamics. Biologists try to understand the life process by chemical language in the field like molecular biology and chemical genetics. Therefore, the Chemistry Department offers this Minor for those students who need a knowledge of chemistry for their major subjects or those who have an interest in studying chemistry at a higher level. Students are required to take introductory courses in general and analytical chemistry and one other chemistry course from selected areas. The advanced courses emphasize instrumental analysis and spectroscopic techniques. In addition, students may also choose specialized courses in different areas of chemistry such as organic, synthetic, materials, medicinal, environmental, or industrial chemistry as their electives in the second and third years. The Minor is essential to students who major in science-related subjects such as the biological, medical, material and environmental sciences.

I. Objectives

The saying, "Think global, act local" has become part of our everyday vocabulary. Whether one is drinking a Coca-Cola, standing at an airport security check-point installed after "9/11", or simply contemplating global warming, it is impossible to ignore the impact of our unprecedented levels of global interdependence. How are we to comprehend the ways in which globalization affects our political, economic, social and personal lives? This multi-disciplinary programme of study is designed to help students better understand the multi-dimensional interconnectedness between individuals, societies, and countries that characterizes today's world. It represents a collaboration of core departments in the faculty and is intended to provide students with the foundation for examining the impact of globalization on the world around us from a variety of theoretical perspectives. As this programme of study pays particular attention to issues of Asia and social change in the global context, it is highly relevant for students considering careers in the public and private sectors that require a regional or international focus.

7. Media and Cultural Studies

(Candidates only be allowed to minor in either Media and Cultural Studies or Journalism and Media Studies.)

I. Objectives:

The media are central to our experience and identities in today's modern world. We find ourselves increasingly saturated by messages and ideas from television, radio, print media, advertisement, cinema and the internet. The media not only shape our education, politics, art and entertainment,

constituting our worldviews, identities and fantasies, they also help to connect and divide communities locally, nationally and globally. Their influences are further complicated by the rise of new information technology and the globalization of outlook and resources posing us new demands and challenges. To what extent will those changes result in a multiplicity of lifestyles and identities? Are we getting more homogenized and westernized? Questions of this kind are under considerable discussion in the social sciences as it becomes clear that culture, life-styles as well as class, gender and ethnic identities are the grounds on which economic, social and political forces of the new era work themselves out. In this programme, the connection between individuals, their communities, and the world, mediated by culture and the media, are now being examined in relation to global versus local, modern versus tradition, diaspora versus nationalism, and culture versus market.

This multidisciplinary programme of study represents the collaboration of the core departments in the Faculty and other departments in the University and is intended to provide students with the foundation for examining the role of media and culture in today's society from a variety of perspectives. It is principally concerned with developing informed and critical understanding and responses to the media and culture and considering the relationships between the two. It enables students to engage lively with issues concerning the relationship between culture and identity, forms of representation, and the role of media in shaping the ways we live in class discussion and project presentation. It also equips students with useful tools and analytical skills to researching media and culture.
