REGULATIONS FOR THE DEGREE OF BACHELOR OF CHINESE MEDICINE [FULL-TIME] (BChinMed)

The degree of Bachelor of Chinese Medicine is awarded upon the satisfactory completion of a prescribed course of study and clinical training in Chinese medicine. The degree programme is offered by the School of Chinese Medicine, Faculty of Medicine.

BCM 1 Admission to the Degree

To be eligible for admission to the degree of Bachelor of Chinese Medicine, candidates shall

(a) comply with the General Regulations;
(b) comply with the Regulations for First Degree Curricula; and
(c) satisfy all the requirements of the curriculum in accordance with the regulations that follow and the syllabuses of the degree.

BCM 2 Length of Study

The curriculum shall normally require five years of full-time study which may include summer semesters during the period from June to August in each academic year.

BCM 3

Candidates following the part-time curriculum shall not be permitted to transfer to the full-time curriculum, unless approved by the Board of Studies of the School of Chinese Medicine.

BCM 4 Completion of Curriculum

To complete the curriculum, candidates shall

(a) follow the courses of instruction as prescribed in the syllabuses;
(b) satisfy the requirements prescribed in UG 3 of the Regulations for First Degree Curricula except for UG 3 (c) (ii);.
(c) satisfactorily complete altogether 6 credit-units of courses in English language enhancement in addition to the requirements in BCM 4 (b) above;
(d) satisfy the examiners in the examinations and any other forms of assessments; and
(e) undertake the requisite period of clinical clerkship in an approved establishment (recognized by the jurisdiction of the territory in which it is situated) which offers clinical in-patient services in Chinese Medicine.

BCM 5 Selection of Courses

(a) Candidates shall normally take not more than 78 credits in each academic year from the first to the fourth year, unless otherwise permitted or required by the Board of Studies.
(b) Candidates shall have to satisfactorily complete the pre-requisite courses in order to enrol in succeeding courses, unless with the exemption granted by the Heads of the departments offering the courses concerned.
(c) Candidates shall select their courses in accordance with the regulations and the guidelines specified in the syllabuses before the beginning of each academic year. Changes to the selection of course(s) may be made only during the first two weeks of each semester, and such changes shall not be reflected in the transcript of the candidates. Requests for changes after the first two weeks of each semester shall not be considered, and candidates withdrawing from any course without permission after the first two weeks of semester shall be given an F grade.

BCM 6 Assessment and Grades

(a) Candidates shall be assessed for each of the courses which they have registered for, and assessment may be conducted in any one or any combination of the following manners: written examinations or tests, continuous assessment, laboratory work, field work, project reports, or in any other manners.
(b) Grades shall be awarded in accordance with UG 5 of the Regulations for the First Degree Curricula.
(c) Candidates shall not be permitted to repeat courses for which they have received a pass grade for upgrading purposes.
(d) Assessment results of courses in Years 1 to 4 will be counted towards the cumulative GPA while the clinical clerkship in the fifth year, clinical practica, field trip and Chinese Medicine dispensary, will be given “pass” or “fail” grade. Though the grade shall not be counted towards the calculation of cumulative GPA, students must obtain a “pass” in order to complete the curriculum.
(e) Clinical practica and clerkship shall be assessed based on clinical case reports and performance.
(f) Written examinations shall normally be held at the end of each semester unless otherwise stated.

BCM 7 Failure in Examination

(a) Candidates who have failed not more than two core courses and/or electives in a particular semester at the first attempt may be permitted to present themselves for re-examination before the commencement of the examination of the following semester within the same academic year. The grades for all the attempts made will be recorded in the transcript.
(b) Candidates who have failed three or more core courses and/or electives in the first semester of an academic year are required to repeat all of that year’s curriculum.
(c) Candidates who have failed not more than two core courses and/or electives by the end of an academic year after re-examination in any of the semesters within one academic year shall be permitted to repeat the failed course(s) in the next academic year for re-assessment.
(d) Candidates who have failed three or more core courses and/or electives by the end of an academic year are required to repeat all of that year’s curriculum. This applies to all candidates including those who have sat for re-examination in any of the semesters within one academic year. If the candidate fails three or more core courses and/or electives by the end of an academic year after re-examination in any of the semesters within one academic year, he/she is required to repeat all of that year’s curriculum.
(e) Candidates who have failed the same core course or elective for three times shall be considered as having unsatisfactory progress and shall be recommended for discontinuation.
BCM 8  Absence from Examination

Candidate who is unable, because of illness, to present for any paper or papers in an examination, shall be permitted to present himself/herself at a supplementary examination in the paper or papers where such an examination is prescribed in the regulations only if his/her application for permission has the support of the Director of the University Health Service. Any such application shall be made within two weeks of the first day of the candidate’s absence from any examination. Any such supplementary examination shall be regarded as first attempt.

BCM 9

(a) The Chinese title of the degree shall be ‘中醫全科學士’.
(b) The teaching, examinations and assessment of the Chinese Medicine components in the curriculum shall normally be conducted in Chinese, while other courses shall normally be taught and assessed in English.

BCM 10

The degree of Bachelor of Chinese Medicine may be awarded with Honours but a candidate shall not be eligible for Honours if he/she has presented more than once in any part of the Examination.

SYLLABUSES FOR THE DEGREE OF BACHELOR OF CHINESE MEDICINE (BChinMed) [Full-Time]

(To be read in conjunction with Regulations for BChinMed)

Candidates are required to complete all the prescribed courses of the curriculum. These courses comprise core courses, electives, broadening/common core courses, language enhancement courses and course on information technology. Candidates are also required to complete the requisite period of Chinese Medicine Practica and Clinical Clerkship.

I. CORE COURSES

Core courses are classified into four divisions: Chinese Medicine Foundation Studies, Chinese Medicine Classical Texts, Chinese Medicine Clinical Studies, and Biomedical Sciences.

(i) Chinese Medicine Foundation Studies

BCHM1001  Foundation Theories of Chinese Medicine 中醫基礎理論 (12 credits)
BCHM1002  Archaic Chinese Medical Literature 醫古文 (9 credits)
BCHM1003  History of Chinese Medicine 中國醫學史 (3 credits)
BCHM1004  Chinese Materia Medica 中藥學 (12 credits)
BCHM2001  Diagnostics of Chinese Medicine 中醫診斷學 (12 credits)
BCHM2002  Chinese Medicine Prescriptions 方劑學 (9 credits)
BCHM4011  Pharmacology of Chinese Medicine 中藥藥理學 (6 credits)
(ii) Chinese Medicine Classical Texts
BCHM2004 Treatise on Exogenous Febrile Diseases 傷寒論 (9 credits)
BCHM2103 Canon of Chinese Medicine 內經 (6 credits)
BCHM3001 Golden Chamber 金匱要略 (9 credits)
BCHM4001 Seasonal Febrile Diseases 溫病學 (9 credits)
BCHM4002 Schools of Thought of Chinese Medicine 中醫各家學說 (6 credits)

(iii) Chinese Medicine Clinical Studies
BCHM2005 Life Cultivation and Health Care of Chinese Medicine 中醫養生保健學 (6 credits)
BCHM3002 Chinese Internal Medicine 中醫內科學 (21 credits)
BCHM3003 Acupuncture & Moxibustion 針灸學 (12 credits)
BCHM4003 Surgery of Chinese Medicine 中醫外科學 (9 credits)
BCHM4004 Gynaecology of Chinese Medicine 中醫婦科學 (9 credits)
BCHM4005 Paediatrics of Chinese Medicine 中醫兒科學 (9 credits)
BCHM4006 Traumatology & Orthopaedics of Chinese Medicine 中醫骨傷科學 (12 credits)
BCHM4007 Otorhinolaryngology of Chinese Medicine 中醫耳鼻喉科學 (6 credits)
BCHM4012 Ophthalmology of Chinese Medicine 中醫眼科學 (3 credits)

(iv) Biomedical Sciences
BCHM1008 Anatomy (9 credits)
BCHM1009 Histology and Embryology (3 credits)
BCHM1011 Physiology (9 credits)
BCHM1017 Biochemistry (6 credits)
BCHM2108 Pathology (9 credits)
BCHM2011 Microbiology (3 credits)
BCHM2014 Immunology (3 credits)
BCHM3005 Fundamentals of Diagnosis (12 credits)
BCHM3007 Medical Statistics & Social Medicine (6 credits)
BCHM4013 Medicine (6 credits)
PHAR3001 Clinical Pharmacology I (3 credits)
PHAR3002 Clinical Pharmacology II (3 credits)

II. ELECTIVES
Electives may be chosen from the list below. The courses listed will not necessarily be offered every year; from time to time, depending on the exigencies of staff, additional courses may be offered. Candidates are required to satisfactorily complete 18 credit-units of electives.

CHIN1207 Traditional Chinese Culture 傳統中國文化 (3 credits)
BCHM2009 Introduction to Zhou Yi 周易基礎知識 (3 credits)
BCHM3004 Tui-na of Chinese Medicine 推拿學 (6 credits)
BCHM4014 Introduction to Differential Diagnosis of Critical and Severe Diseases 急重症診斷概要 (3 credits)
BCHM4009 Medical Psychology 醫學心理學 (3 credits)

III. Chinese Medicine Practica and Clinical Clerkship
BCHM1015 Chinese Medicine Practicum I (3 credits)
BCHM2109 Chinese Medicine Practicum II (6 credits)
BCHM3008 Chinese Medicine Practicum III (6 credits)
BCHM4015 Chinese Medicine Practicum IV (6 credits)
BCHM5001 Clinical Clerkship (200 credits)
Candidates are required to complete Chinese Medicine Practicum I to IV and Clinical Clerkship as stipulated in the syllabus. Chinese Medicine Practicum includes clinical practica and/or field trip and Chinese Medicine dispensary practicum. Clinical practica involves clinical observation of out-patient practice undertaken by a mentor and the completion of medical case reports. Clinical clerkship involves attachment in an establishment recognized under BCM 4(e) in the Regulations for BChinMed. Candidates should complete the practica as required by the School during the first four years and 40 weeks of clerkship during the fifth year.

IV. BROADENING COURSES
Candidates are required to complete 6 credit-units of Broadening Courses\(^1\) by the end of the second year and fulfill the requirements as specified in UG3 (b) and (c) of the Regulations for First Degree Curricula and BCM4(b) of the Regulations for BChinMed.

V. LANGUAGE ENHANCEMENT COURSES
\[
\begin{align*}
\text{CBIO0003} & \quad \text{Practical Chinese Language Course for Chinese Medicine Students (3 credits)} \\
\text{CBIO0004} & \quad \text{Putonghua Course for Chinese Medicine Students\(^2\) (non-credit bearing)} \\
\text{ECEN1707} & \quad \text{Academic English for Chinese Medicine Students (3 credits)} \\
\text{ECEN2708} & \quad \text{English for Clinical Clerkship for Chinese Medicine Students (3 credits)}
\end{align*}
\]

VI. COURSE ON INFORMATION TECHNOLOGY
Candidates are required to fulfill the requirement in UG3 (d) by the end of the second year:

\(^1\) Students may take the common core curriculum courses to satisfy the UG3 requirements.

\(^2\) “Putonghua Course for Chinese Medicine Students” is a non-credit bearing course which is offered to the first year BChinMed students for helping them to cope with courses taught in Putonghua throughout the five-year curriculum.

\(^3\) All broadening courses should normally be satisfactorily completed by the end of the second year.

\(^3\) All broadening courses should normally be satisfactorily completed by the end of the second year.

\(^4\) “Fundamentals of Diagnosis” will spread over year 3 and the first semester of year 4, and the examination will be held at the end of the first semester of year 4.
BCHM1001. Foundation Theories of Chinese Medicine 中醫基礎理論 (12 credits)

Explication of the philosophical foundations of Chinese Medicine. Understanding of the physiological, pathological and disease prevention principles from Chinese Medicine perspective. This course enables students to acquire a solid grounding in Chinese Medicine theory which serves to prepare them for studies in Diagnostics of Chinese Medicine, Chinese Materia Medica, Chinese Medicine Prescriptions and the clinical subjects of Chinese Medicine.

BCHM1002. Archaic Chinese Medical Literature 醫古文 (9 credits)

Introduction to Chinese medical texts from pre-Qin dynasties. Appreciation of different textual genres, format, and language usage. Examples of archaic literary styles drawn from biographies of renowned physicians, medical theses, prefaces and records of case histories.

BCHM1003. History of Chinese Medicine 中國醫學史 (3 credits)

Historical analysis of the origin, formation and development of Chinese Medicine as a field of practice and academic discipline.

BCHM1004. Chinese Materia Medica 中藥學 (12 credits)

Studies on the sources, procurement, processing, properties, actions and clinical usages of Chinese medicinal materials. This course provides proper foundation for studies in Chinese Medicine Prescriptions and the clinical subjects of Chinese Medicine.  
*Pre-requisite: Diagnostics of Chinese Medicine 中醫診斷學*

BCHM1008. Anatomy (9 credits)

This course provides the students with an account of basic anatomical facts and concepts that they need to know in the health profession. It provides a basis for the understanding of the structural organization of individual organs and the human body as a whole and individual organs as well as an appreciation of their functions in clinical practice. The course includes the study of the locomotor system (bone, muscle and joint), circulatory system, respiratory system, digestive system, urogenital system, endocrine system and nervous system.

BCHM1009. Histology and Embryology (3 credits)

Histology provides the students with microscopic structure, component, and function of the basic tissue types. Its aim is to enable the students to distinguish the morphological characteristics of different tissues at microscopic level. Embryology aims to provide students with basic knowledge of the development of an individual during prenatal stage and to highlight the significance of common developmental anomalies.

BCHM1011. Physiology (9 credits)

This course introduces the fundamental concepts of human physiology to the students, enabling them to understand the mechanisms of body functions at the molecular, cellular, organ-system and organismic levels. Topics covered in the course include cellular, blood and muscle physiology, and the physiology of major body systems such as the cardiorespiratory systems, the urogenital system, the gastrointestinal and liver systems, as well as the nervous and endocrine systems.
BCHM1017. Biochemistry (6 credits)

This course is designed to introduce the fundamental concepts of biochemistry and to enable them to understand the molecular basis of the biochemical processes in the living organisms, and to provide the basic concepts of metabolism: the biomedical events and the importance in relation to human health and disease.

This course aims to develop competence in the four methods of physical diagnosis, analysis of clinical manifestations according to eight principal syndromes, method of differential diagnosis and skills of clinical history taking. The course serves to bridge theoretical knowledge with practice.  
*Pre-requisite: Foundation Theories of Chinese Medicine 中醫基礎理論*

BCHM2002. Chinese Medicine Prescriptions 方劑學 (9 credits)

*Pre-requisite: Chinese Materia Medica 中藥學*

BCHM2004. Treatise on Exogenous Febrile Diseases 傷寒論 (9 credits)

*Pre-requisite: Canon of Chinese Medicine 内經*

BCHM2005. Life Cultivation and Health Care of Chinese Medicine 中醫養生保健學 (6 credits)

This course studies the therapeutic approach in Chinese Medicine for the prevention of aging.  
*Pre-requisite: Chinese Internal Medicine 中醫內科學*

BCHM2009. Introduction to Zhou Yi 周易基礎知識 (3 credits)

Zhou Yi is recognized as the origin of Chinese culture. Appreciation to its immeasurable wisdom and philosophy that form the basis of knowledge will be helpful for comprehension of the principle concepts of Chinese Medicine. The course aims at introducing the philosophical teachings and equipping students with the basic knowledge for further studying Zhou Yi.

BCHM2011. Microbiology (3 credits)

This course provides the students with the knowledge of medically important micro-organisms. This includes their classification, the main pathogenic mechanisms, and their roles in causing human infections. Common and important infectious diseases are introduced using a system-based approach. The epidemiology, clinical manifestations, and the principles of diagnosis, management, and prevention of infectious diseases are highlighted.  
*Pre-requisite: Biochemistry I*
BCHM2014. Immunology (3 credits)

This course is specially formulated for the Chinese Medicine students in their second year of the degree study. The main objective is to enable the students to understand basic immunological concepts and mechanisms of the immune system both in health and in diseases. Upon completion of the course, the students are expected:
1. to grasp the concepts of antigen, antibody (immunoglobulin), complement, innate and adaptive immunity, humoral and cellular immunity, cytokines, MHC/HLA system, immune response and tolerance;
2. to be able to apply immunological principles in relation to clinical situations including: infection, hypersensitivity, autoimmunity, immunodeficiency, tumor and transplantation rejection;
3. to be able to apply knowledge of immunity in combination with the principles of Chinese medicine in their understanding of the body defense mechanisms against diseases;
4. to have some exposure on commonly used immunological techniques.

BCHM2103. Canon of Chinese Medicine 內經 6 credits)

Evolution of a theoretical framework guided by different schools of thought and annotations of the original text by successive writers. Systematic treatment of sections of the Canon dealing with the following topics and their clinical applications: theories of Yin-Yang and five elements; doctrine of viscera-state, meridians; aetiology and pathogenesis; symptoms; diagnostic methods; principles and methods of treatment and concept of nourishment.
Pre-requisite: Foundation Theories of Chinese Medicine 中醫基礎理論

BCHM2108. Pathology (9 credits)

This course introduces the basic contents of pathology including the knowledge of injury and repair of cells and tissues, disorder of local circulation, edema, anoxia, disseminated intravascular coagulation, shock, inflammation, fever, tumour, pathology of cardiovascular system, respiratory system, digestive system, genitourinary system, and common infectious diseases and parasitosis.
Pre-requisite: Physiology

CHIN1207. Traditional Chinese Culture 傳統中國文化 (3 credits)

(This course is also offered to non-BA students for inter-Faculty broadening purposes)
An introduction to the general characteristics of traditional Chinese culture. The course is especially suitable for students from non-Arts backgrounds.
Assessment: 100% coursework

BCHM3001. Golden Chamber 金匱要略 (9 credits)

Introduction to the original text of “Golden Chamber”. General exposition of CM medical paradigm. Applications of Doctrine of viscera-state; concepts of disease formation; principles of differential diagnosis; principles and methods of treatment; techniques of ingredients selection in prescription compounding; methods of decoction preparation and usage in the differential diagnosis and treatment of miscellaneous diseases.
Pre-requisite: Treatise on Exogenous Febrile Diseases 傷寒論
**BCHM3002. Chinese Internal Medicine 中醫內科學 (21 credits)**

This course aims to develop an understanding of the theoretical basis of CM internal medicine. Students will be acquainted with the methods of differential diagnosis and prescriptions applied to various diseases of the CM internal medicine specialty.

*Pre-requisite: Chinese Medicine Prescriptions 方劑學*

**BCHM3003. Acupuncture & Moxibustion 針灸學 (12 credits)**

*Pre-requisite: Chinese Internal Medicine 中醫內科學*

**BCHM3004. Tui-na of Chinese Medicine 推拿學 (6 credits)**

Chinese characters “tui-na” mean “pushing -grapping” which represent various body mainly hand-on therapeutic techniques. Application of these techniques on specific areas or points of the body surface according to individual physiological and pathogenic patterns can achieve preventive and therapeutic effects. This course aims at introducing the history, theory, tui-na techniques, principles and methods of treatment and the management of clinical disorders. Specific baby tui-na techniques and the treatment of paediatric disorders will also be studied.

*Pre-requisite: Chinese Internal Medicine 中醫內科學*

**BCHM3005. Fundamentals of Diagnosis (12 credits)**

This course provides the students with the knowledge and skills of diagnosis for further study of clinical subjects. It includes history taking of patients, performing the systemic physical examination, significance of laboratory tests, the examinations using medical equipments, analyzing the above collected data, and how to write a whole patient record and make a primary diagnosis.

*Pre-requisite: Pathology*

**BCHM3007. Medical Statistics & Social Medicine (6 credits)**

This course is to familiarize the Chinese Medicine students with the methods and applications of statistics in common epidemiological issues. Social medicine, also called community medicine or public health medicine, is concerned with health and disease as a function of the community as a whole rather than the individual. The discipline emphasizes on the roles of preventive medicine, health promotion and socioeconomics from a societal perspective.

**BCHM4001. Seasonal Febrile Diseases 溫病學 (9 credits)**

Evolution of a theoretical framework around the doctrine of febrile diseases. Introduction to authoritative writings of renowned physicians, including: Ye Tian Shi (Treatise on Seasonal Febrile Diseases), Xue Sheng Bai (Exposition of Wetness-Heat Diseases), Kuan Ju Tong (Analysis of Epidemic Febrile Diseases).

*Pre-requisite: Treatise on Exogenous Febrile Diseases 傷寒論*
BCHM4002. Schools of Thought of Chinese Medicine 中醫各家學說 (6 credits)

Introduction to the various schools of thought and theoretical frameworks of CM. History of CM development. Accounts of renowned physicians: their thinking, achievements and clinical wisdoms.  
*Pre-requisite: History of Chinese Medicine 中國醫學史*

BCHM4003. Surgery of Chinese Medicine 中醫外科學 (9 credits)

The topics in this course are guided by the medical maxim which states “internal diseases reveal through external manifestations”. A holistic view of disease formation and development through a supposition of internal – external disease relationship is adopted. Methods of systemic and localized treatment for the prevention of external diseases are introduced.  
*Pre-requisites: Chinese Internal Medicine 中醫內科學*

BCHM4004. Gynaecology of Chinese Medicine 中醫婦科學 (9 credits)

This course aims to develop an understanding of the theoretical basis of gynaecology. Students are expected to apply the clinical guiding principles of “theory-method-prescription-medicine” in the differential diagnosis and treatment of gynaecological disorders relating to: menstrual, leukorrhagic, pregnancy-related, puerperal and miscellaneous gynaecopathics.  
*Pre-requisites: Chinese Internal Medicine 中醫內科學*

BCHM4005. Paediatrics of Chinese Medicine 中醫兒科學 (9 credits)

This course studies the phases of growth and development, care and disease prevention in children. Students will be able to apply their knowledge of CM Theory and CM Internal Medicine in clinical practice. The development of competence in differential diagnosis and treatment of common, communicable and other childhood diseases will be emphasized.  
*Pre-requisite: Chinese Internal Medicine 中醫內科學*

BCHM4006. Traumatology & Orthopaedics of Chinese Medicine 中醫骨傷科學 (12 credits)

*Pre-requisite: Chinese Internal Medicine 中醫內科學*

BCHM4007. Otorhinolaryngology of Chinese Medicine 中醫耳鼻喉科學 (6 credits)

This course emphasizes the understanding of relations between the ‘five sensory organs’ and the whole body system. The topics deal with linkages between the sensory organs and the zang-fu as well as the meridian and collateral systems. Students will be familiarized with various sensory organ diseases in relation to aspects of disease aetiology, pathogenesis, and syndrome-manifestations, etc. as well as the internal and external treatment methodologies employed.  
*Pre-requisite: Chinese Internal Medicine 中醫內科學*
BCHM4014. Introduction to Differential Diagnosis of Critical and Severe Diseases
急重病証鑒別診斷概述 (3 credits)

This course is aiming at explaining the diagnosis and differential diagnosis of critical and severe diseases that commonly seen in clinical practice, covering sudden death, acute abdominal symptoms, high fever, heart failure, renal failure, hypertensive brain diseases, coma, hemorrhage, the toxic-side effects of Chinese medicines etc. in order to reinforce Chinese Medicine students’ understanding on critical and severe diseases.

Pre-requisite: Chinese Internal Medicine 中醫內科學

BCHM4009. Medical Psychology 醫學心理學 (3 credits)

This course studies the role of psychological phenomenon in health and disease. It covers the general principles of modern psychology and the essential opinions in psychology of Chinese Medicine. Through studying the course students are expected to comprehend the interaction between psychological phenomenon and physiological activities, which in turn will enable students to understand patients’ psychological activities in order to communicate with patients effectively. Furthermore, it aims at introducing the significance of psychological factors in prevention and treatment of diseases.

BCHM4011. Pharmacology of Chinese Medicine 中藥藥理學 (6 credits)

Contrast to studying Chinese Materia Medica (CMM) with the pharmacological principles of CM such as the “Qi and Wei (properties) theory”, analysing CMM by applying the principles and techniques from modern pharmacology represents a new area of development and it has contributed to the understanding of CMM in biochemical and biomedical sciences. Base on the principles of pharmacology, this course studies the pharmacodynamics, pharmacokinetics and toxicology of Chinese materia medica.

Pre-requisites: Chinese Materia Medica 中藥學 & Fundamentals of Diagnosis

BCHM4012. Ophthalmology of Chinese Medicine 中醫眼科學 (3 credits)

The physiological function and disorders of the eyes co-relate with the whole body system demonstrates that the body is an integrated whole.
